ANALYSIS

Race, Place, And Structural Racism: A Review Of Health And History In Washington, D.C.

ABSTRACT Recent events have amplified the debilitating effects of systemic racism on the health of the United States. In an effort to improve population health and dismantle more than 400 years of racial injustice, retrospective examinations of policies, practices, and events that have sustained and continue to undergird racial hierarchy are necessary. In this historical review we feature Washington, D.C.—a city with a legacy of Black plurality. We begin with an overview of contemporary place-based health and socioeconomic disparities. To express the etiology of the trends and uncover opportunities to undo the damage, we reflect on the national landscape as well as on policies and events that socially, economically, and politically disenfranchised Black residents, yielding stark differences in health outcomes among Washington, D.C., populations. In the spirit of atonement in policy and practice, we hope that this approach will inspire policy makers and practitioners in communities across the nation to conduct similar examinations.

Racism and race-based residential segregation are often measured at a particular point in time. However, it is essential to use a historical analysis to truly understand their effects on health. Illustrating this, when she was asked about apartheid in South Africa while giving a radio interview in 2004, Nelson Mandela's daughter Zindzi argued that "racism is not an event. It is a process."¹ Racism and racial inequities in health are each complex problems. Disagreement about the nature and causes of racial health inequities and the most viable and impactful solutions are common.² Part of the source of the disagreement is that policies and practices that might not appear to be driven by beliefs and ideologies about race and ethnicity nonetheless have important implications for how societal resources that are critical for health and well-being are allocated.³

Rebecca Blank and colleagues note that although some behaviors, policies, and other ac-

tions are intentionally designed to treat specific groups less favorably than others, other such actions have different impacts on population health and well-being even though that was not the intention of the actors.⁴ It is critical to understand the differential benefits and harms of actions regardless of intention because they have implications for how resources that shape health and well-being are allocated.⁵ Recognition of how structural racism is operationalized and its influence on health also is critical. According to Zinzi Bailey and colleagues, structural racism is "the totality of ways in which societies foster racial discrimination through mutually reinforcing systems of housing, education, employment, earnings, benefits, credit, media, health care, and criminal justice. These patterns and practices in turn reinforce discriminatory beliefs, values, and distribution of resources."⁶

To improve population health, it is imperative to identify and examine the policies, practices, and events that have sustained and continue to

Race Place A Legal History Of The Neig:

Race, Place, and the Law, 1836-1948 David Delaney, 2010-06-28 Black and white Americans have occupied separate spaces since the days of the big house and the quarters But the segregation and racialization of American society was not a natural phenomenon that just happened The decisions enacted into laws that kept the races apart and restricted blacks to less desirable places sprang from legal reasoning which argued that segregated spaces were right reasonable and preferable to other arrangements In this book David Delaney explores the historical intersections of race place and the law Drawing on court cases spanning more than a century he examines the moves and countermoves of attorneys and judges who participated in the geopolitics of slavery and emancipation in the development of Jim Crow segregation which effectively created apartheid laws in many cities and in debates over the doctrine of changed conditions which challenged the legality of restrictive covenants and private contracts designed to exclude people of color from white neighborhoods This historical investigation yields new insights into the patterns of segregation that persist in American society today School Desegregation in Ten Communities United States Commission on Civil Rights, 1974 The Commission on Civil Rights conducted its current study of ten school districts during the late fall and winter of the 1972 73 school year The purpose of this study is to reexamine earlier findings and explore more deeply the dynamics of school desegregation and community reaction In brief the Commission found that one reason why many people are uneasy about desegregation is their fear that it will result in a poorer quality of education for their children It is necessary to prepare carefully and sensitively for desegregation The technical problems of achieving desegregation such as determining the most appropriate desegregation technique and dealing with the problems incident to increased busing have proven to be far less formidable than previously believed Many school officials in their concern to facilitate a successful transition to desegregation have tended to consider the needs and desires of the white community alone sometimes assuming that minority parents will welcome desegregation on almost any terms The way in which school officials civic leaders and the news media respond to disruptive incidents can serve either to preserve an atmosphere of calm or heighten tension even more There is a sharp contrast between the reaction of communities to their own experience in desegregation and their expressed feelings concerning desegregation as a general proposition Finally the effects of the controversy at the national level concerning busing and school desegregation have been felt in a number of communities visited by Commission staff Author JM *A Long Day's Journey Into Light* United States Commission on Civil Rights, 1976 **Hearings, Reports and Prints of the Senate Committee on the Judiciary** United States. Jennifer Mandel, 2022-03-29 From the middle of the nineteenth century as Euro Americans moved westward they carried with
them long held prejudices against people of color By the time they reached the West Coast their new settlements included
African Americans and recent Asian immigrants as well as the indigenous inhabitants and descendants of earlier Spanish and
Mexican settlers The Coveted Westside deals with the settlement and development of Los Angeles in the context of its
multiracial multiethnic population especially African Americans Mandel exposes the enduring struggle between Whites
determined to establish their hegemony and create residential heterogeneity in the growing city and people of color equally
determined to obtain full access to the city and the opportunities including residential that it offered Not only does this book
document the Black homeowners fight against housing discrimination it shares personal accounts of Blacks efforts to settle in
the highly desirable Westside of Los Angeles Mandel explores the White derived social and legal mechanisms that created
this segregated city and the African American led movement that challenged efforts to block access to fair housing

Linning, Tamara D. Herold, 2023-03-22 This brief describes the theory and evidence of a form of social control known as place management. Created by property owners, place management is an alternative to the two other domains of social control: formally created by the state and informally created by residents. It helps explain the high concentration of crime and disorder at a relatively small proportion of addresses and facilities. This volume examines the specifics of place management and extends it in three ways: to show how high crime places may radiate crime into their surroundings; to reveal networks of places that create crime hotspots spanning blocks; to demonstrate how networks of place managers influence crime throughout neighborhoods. Finally, it shows that the policy implications of place management extend far beyond the police and should include regulatory policies.
