Race Science And Society:

Race, Science and Society Unesco, Leslie Clarence Dunn, 1975 **Fault Lines** Jonathan Jansen, Cyril Walters, 2020-03-31 What is the link if any between race and disease How did the term baster as mixed race come to be mistranslated from incest in the Hebrew Bible What are the roots of racial thinking in South African universities How does music fall on the ear of black and white listeners Are new developments in genetics simply a backdoor for the return of eugenics For the first time leading scholars in South Africa from different disciplines take on some of these difficult questions about race science and society in the aftermath of apartheid This book offers an important foundation for students pursuing a broader education than what a typical degree provides and a must read resource for every citizen concerned about the lingering effects of race and racism in South Africa and other parts of the world **Race, Power and Social Segmentation in Colonial Society** Brian L. Moore, 2023-05-03 Race Power and Social Segmentation in Colonial Society 1987 studies Guyanese society after slavery and specifically examines the area of social classes and ethnic groups It also focuses on the theoretical issues in the debate on pluralism versus stratification and provides a detailed interdisciplinary analysis of the process of structural change in a composite colonial society over a significantly long historical period over half a century **Science & Society**, 1943 **Race, Science and Society** Leo Kuper, 1975 **The Remnants of Race Science** Sebastián Gil-Riaño, 2023-08-29 After World War II UNESCO launched an ambitious international campaign against race prejudice Casting racism as a problem of ignorance it sought to reduce prejudice by spreading the latest scientific knowledge about human diversity to instill mutual understanding between groups of people This campaign has often been understood as a response led by British and U S scientists to the extreme ideas that informed Nazi Germany Yet many of its key figures were social scientists either raised in or closely involved with South America and the South Pacific The Remnants of Race Science traces the influence of ideas from the Global South on UNESCO s race campaign illuminating its relationship to notions of modernization and economic development Sebastián Gil-Riaño examines the campaign participants involvement in some of the most ambitious development projects of the postwar period In challenging race prejudice these experts drew on ideas about race that emphasized plasticity and mutability in contrast to the fixed categories of scientific racism Gil-Riaño argues that these same ideas legitimated projects of economic development and social integration aimed at bringing ostensibly backward indigenous and non European peoples into the modern world He also shows how these experts promotion of studies of race relations inadvertently spurred a deeper reckoning with the structural and imperial sources of racism as well as the aftermath of the transatlantic slave trade Shedding new light on the postwar refashioning of ideas about race this book reveals how internationalist efforts to dismantle racism paved the way for postcolonial modernization projects **Science for Society: a Bibliography** Howard T. Bausum, 1972 **Degrees of Mixture, Degrees of Freedom** Peter Wade, 2017-05-04 Race mixture or mestizaje has played a critical role in the history culture and politics of Latin

America In Degrees of Mixture Degrees of Freedom Peter Wade draws on a multidisciplinary research study in Mexico Brazil and Colombia He shows how Latin American elites and outside observers have emphasized mixture s democratizing potential depicting it as a useful resource for addressing problems of racism claiming that race mixture undoes racial difference and hierarchy while Latin American scientists participate in this narrative with claims that genetic studies of mestizos can help isolate genetic contributors to diabetes and obesity and improve health for all Wade argues that in the process genomics produces biologized versions of racialized difference within the nation and the region but a comparative approach nuances the simple idea that highly racialized societies give rise to highly racialized genomics Wade examines the tensions between mixture and purity and between equality and hierarchy in liberal political orders exploring how ideas and scientific data about genetic mixture are produced and circulate through complex networks **The Journal of Race Development** ,1922

The Nature of Difference George Ellison,Alan H. Goodman,2006-04-19 Unprecedented advances in genetics and biotechnology have brought profound new insights into human biological variation These present challenges and opportunities for understanding the origins of human nature the nature of difference and the social practices these sustain This provides an opportunity for cooperation between the biological and s **Minorities in American Society** Charles Frederick Marden,Gladys Meyer,1978 *Culture, Science, Society* Gyorgy Markus,2011-04-07 The book addresses the constitution of the high culture of modernity as an uneasy unity of the sciences including philosophy and the arts Their internal dynamism and strain is established through on the one hand the relationship of the author work recipient and on the other the respective roles of experts and the market **Superior** Angela Saini,2019-05-21 2019 Best Of Lists 10 Best Science Books of the Year Smithsonian Magazine Best Science Books of the Year NPR s Science Friday Best Science and Technology Books from 2019 Library Journal An astute and timely examination of the re emergence of scientific research into racial differences Superior tells the disturbing story of the persistent thread of belief in biological racial differences in the world of science After the horrors of the Nazi regime in World War II the mainstream scientific world turned its back on eugenics and the study of racial difference But a worldwide network of intellectual racists and segregationists quietly founded journals and funded research providing the kind of shoddy studies that were ultimately cited in Richard Herrnstein and Charles Murray s 1994 title *The Bell Curve* which purported to show differences in intelligence among races If the vast majority of scientists and scholars disavowed these ideas and considered race a social construct it was an idea that still managed to somehow survive in the way scientists thought about human variation and genetics Dissecting the statements and work of contemporary scientists studying human biodiversity most of whom claim to be just following the data Angela Saini shows us how again and again even mainstream scientists cling to the idea that race is biologically real As our understanding of complex traits like intelligence and the effects of environmental and cultural influences on human beings from the molecular level on up grows the hope of finding simple genetic differences between races to explain differing rates

of disease to explain poverty or test scores or to justify cultural assumptions stubbornly persists At a time when racialized nationalisms are a resurgent threat throughout the world Superior is a rigorous much needed examination of the insidious and destructive nature of race science and a powerful reminder that biologically we are all far more alike than different
