Women's Football in the UK Jayne Caudwell, 2013-10-18 This book examines the complex ways in which girls and women experience football cultures in Britain It extends current debate surrounding women and football namely how gender has functioned to shape women's experiences of playing the game by focusing on organisational administrative and coaching practices alongside the particular issues surrounding sexuality ethnicity and disability not only gender The book analyses football and gender to reveal the subtle forms of discrimination that persist It is important to highlight the many challenges and transformations made by girls and women but more importantly to consider the ways power continues to operate to devalue and undermine girls and women involved in the game The UK based authors make use of their recent research findings to offer critical debate on girls and women's current experiences of British football cultures Overall the book reveals the present day complexities of marginalisation and exclusion This book was published as a special issue of Sport and Society

Sport: Race, Ethnicity and Identity Daryl Adair, 2013-09-13 Sport has long been a paradoxical environment with respect to issues of race ethnicity and identity For much of the twentieth century sports around the world were enclaves of difference Whites and non whites for example were separated on the sports field as they were in many ways off the field Today sport is much more inclusive with athletic ability of greater importance than skin colour or ancestry Yet enmity and antagonism still appear in sport via instances of racial vilification or hostility between some groups Other problems include the relative absence of minorities from positions of power and influence in sport as well as folkloric assumptions about athletic ability based upon stereotypes about race or ethnic background This book discusses issues of diversity capacity and equity in the colourful world of global sport A panoramic approach covering race ethnicity and identity is consistent with the contemporary global migration of professional athletes as well as the multicultural contexts of sport in various regions This collection of essays therefore addresses international dimensions of sport commonality and difference as well as the special circumstances of sport and social relations in particular places This book was previously published as a special issue of Sport in Society

Diversity, equity and inclusion in sport and leisure

Katherine Dashper, Thomas Fletcher, 2016-01-08 Despite the mythology of sport bringing people together and encouraging everyone to work collectively to success modern sport remains a site of exclusionary practices that operate on a number of levels Although sports participation is in some cases at least becoming more open and meritocratic at the management level it remains very homogenous dominated by western white middle aged able bodied men This has implications both for how sport develops and how it is experienced by different participant groups across all levels Critical studies of sport have revealed that rather than being a passive mechanism and merely reflecting inequality sport via social agents interactions with sporting spaces is actively involved in producing reproducing sustaining and indeed resisting various manifestations of inequality The experiences of marginalised groups can act as a resource for explaining contemporary political struggles over what sport means how it should be played and by whom and its place within wider society Central to this collection is the argument that the dynamics of cultural identities are contextually contingent influenced heavily by time and place and the extent to which they are embedded in the culture of their geographic location They also come to function differently within certain sites and institutions be it in one s everyday routine or leisure pursuits such as sport Among the themes and issues explored by the contributors to this volume are social inclusion and exclusion in relation to class race and ethnicity gender and sexuality social identities and authenticity social policy deviance and fandom This book was published as a special issue of Sport in Society
