Pathology Of Malignant Mesothelioma:

Pathology of Malignant Mesothelioma Francoise Galateau-Sallé, 2010-05-06 Mesothelioma is a global problem largely related to the previous use of asbestos products Diagnosis is very difficult because of its diverse appearances and the potential for other diseases to mimic it Written by experienced international experts to aid in pathological diagnosis this book deals with clinical radiological epidemiological molecular and histopathological aspects of the disease Tumors of the pleural pericardial peritoneal cavities as well as the ovary and tunica vaginalis are considered Differential diagnoses of serosal based lesions are discussed and the use of immunohistochemical stains is explained Plentiful illustrations give further aid to diagnosis An essential read for all diagnostic pathologists as well as general pathologists who are sometimes required to diagnose the disease at biopsy or post mortem also invaluable to medical and legal professions involved with various aspects of the disease

Pathology of Malignant Mesothelioma Francoise Galateau-Sallé, 2005-11-16 Only up to date title in the market Current topic with significant media coverage Internationally relevant the use of asbestos and its consequences is a global problem This title aids in pathological diagnosis which is very difficult Contributors are experts from France UK USA Australia and Canada Plentiful colored illustrations complete the text Target group exceeds pathologists The diagnosis is evidence for medico legal purposes which makes the book invaluable to members of legal profession specializing in this disease

Pathology of the Mesothelium John S.P. Jones, 2012-12-06 Many books have been written about the pathology of the major organs of the body such as the lungs heart gastrointestinal tract etc Included in these are descriptions often with a minor emphasis of pathological conditions which affect their serosal surfaces In this book I have endeavoured to reverse the process and treat the mesothelium as an organ in its own right rather than being the no man s land between various major structures A number of pathological conditions are common to the coverings of the three major body cavities the pleura pericardium and peritoneum while some abnormalities are exclusive to one or other sites I hope that the contents of this book cover a broad enough spectrum of mesothelial diseases to be of help to service pathologists who are ever increasingly being asked to make diagnoses particularly on small biopsies of pleural and peritoneal tissues It is also my hope that the various aspects of the subject have been dealt with in sufficient depth to be of use to pathologists engaged in teaching and research and to those whose interests lie in the structure and function of the mesothelium There is still much to be learned in understanding the way the mesothelium behaves in the realm of both inflammatory response and tumour formation If this book provides a stimulus to furthering research in these fields I feel it will have achieved its objective

Diffuse Malignant Mesothelioma Timothy Craig Allen, 2015-02-23 This volume is the most up to date text available on diffuse malignant mesothelioma and includes all the newest imaging modalities immunohistochemical features and ever expanding information on the molecular characteristics of the cancer In depth chapters contain fully referenced text as well as detailed tables and images While the primary audiences for this book are pathologists and pathology residents the broad examination
