**Lymphomas** 1 John M. Bennett,2012-12-06 Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good in depth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more      Current Catalog National Library of Medicine (U.S.),

Scarantino,2012-12-06 At first glance it appears that little has happened in our understanding of bronchogenic carcinoma since five year survival rates have not changed appreciably over the past ten years This is partially true however the depth of our understanding has increased and will continue to do so at a rapid pace over the next five to ten years Information on the basic tumor biology identification of important groups at high risk and improved delivery of cytotoxic agents in the treatment of lung cancer will all add to improve the outcome The purpose of this text is to provide useful background information and to serve as a reference for approaching the patient with lung cancer Therefore it will serve as a review for some and as a beginning for others An important starting point in any discussion of lung cancer is an epidemiological survey of the topic Chapter I For those who do not avoid the hazards and present with symptoms what is the most logical approach in determining the diagnosis Chapter II This chapter is intended to provide a general overview of the subjects covered in detail in the remainder of the text      *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70      **Rest Uneasy** Brittany Cowgill,2018-05-07 Tracing the Sudden
