Paths To Musical Thought:

Paths to Musical Thought: An Approach to Ear Training Murray J. Gould, 1979 *The Musical Thought and Spiritual Lives of Heinrich Schenker and Arnold Schoenberg* Matthew Arndt, 2017-09-11 This book examines the origin content and development of the musical thought of Heinrich Schenker and Arnold Schoenberg One of the premises is that Schenker's and Schoenberg's inner musical lives are inseparable from their inner spiritual lives Curiously Schenker and Schoenberg start out in much the same musical spiritual place yet musically they split while spiritually they grow closer The reception of Schenker's and Schoenberg's work has sidestepped this paradox of commonality and conflict instead choosing to universalize and amplify their conflict Bringing to light a trove of unpublished material Arndt argues that Schenker's and Schoenberg's conflict is a reflection of tensions within their musical and spiritual ideas They share a particular conception of the tone as an ideal sound realized in the spiritual eye of the genius The tensions inherent in this largely psychological and material notion of the tone and this largely metaphysical notion of the genius shape both their musical divergence on the logical technical level in theory and composition including their advocacy of the *Ursatz* versus twelve-tone composition and their spiritual convergence including their embrace of Judaism These findings shed new light on the musical and philosophical worlds of Schenker and Schoenberg and on the profound artistic and spiritual questions with which they grapple *New Paths* John Neubauer, 2009 This is the seventh publication in the series *Collected Writings of the Orpheus Institute* Book Jacket

The Theosophical Path Katherine Augusta Westcott Tingley, 1922 **Metaphors of Depth in German Musical Thought** Holly Watkins, 2011-09-01 What does it mean to say that music is deeply moving Or that music's aesthetic value derives from its deep structure This study traces the widely employed trope of musical depth to its origins in German language music criticism and analysis From the Romantic aesthetics of E T A Hoffmann to the modernist theories of Arnold Schoenberg metaphors of depth attest to the cross pollination of music with discourses ranging from theology geology and poetics to psychology philosophy and economics The book demonstrates that the persistence of depth metaphors in musicology and music theory today is an outgrowth of their essential role in articulating and transmitting Germanic cultural values While musical depth metaphors have historically served to communicate German nationalist sentiments Watkins shows that an appreciation for the broad connotations of those metaphors opens up exciting new avenues for interpretation

Forging Pathways to Improvise Music Joseph Montelione, 2023-08-22 A step by step resource on forging one's own pathway to improvise music this book guides the musician through a clear and simple method that will easily translate to the reader's genre of choice Many musicians struggle with improvisation Coincidentally educators also find it challenging to integrate improvisation into curriculum This book breaks down the barriers most performers and educators combat in the learning and teaching of improvisation and is a helpful approach to demystify the complicated sphere of music improvisation Divided into three sections the first part of the book helps the reader develop an improvisatorial mindset to mentally conceive

musical ideas regardless of genre The second portion then connects the improviser's mindset to translating those ideas into a compelling musical performance in real time The book's final third assists the reader with discovering how to apply this method of improvisation to the nuanced liturgical, comedic jazz and classical styles Forging Pathways to Improvise Music offers a practical introduction to improvisational methods essential for educators, students and musicians of diverse educational backgrounds and musical genres

The Musical Language of Pierre Boulez Jonathan Goldman, 2011-02-17 A fresh look at the musical universe of arguably one of the most influential composers of the twentieth century

Hugo Riemann and the Birth of Modern Musical Thought Alexander Rehding, 2003-05-01 Generally acknowledged as the most important German musicologist of his age, Hugo Riemann (1849-1919) shaped the ideas of generations of music scholars, not least because his work coincided with the institutionalisation of academic musicology around the turn of the last century This influence, however, belies the contentious idea at the heart of his musical thought: an idea he defended for most of his career, harmonic dualism By situating Riemann's musical thought within the turn of the century discourses about the natural sciences, German nationhood and modern technology, this book reconstructs the cultural context in which Riemann's ideas not only made sense but advanced an understanding of the tonal tradition as both natural and German Riemann's musical thought, from his considerations of acoustical properties to his aesthetic and music historical views, thus regains the coherence and cultural urgency that it once possessed

Contemporary Music Mr Max Paddison, Ms Irène Deliège, 2013-01-28 This collection of essays and interviews addresses important theoretical, philosophical and creative issues in Western art music at the end of the twentieth and the beginning of the twenty-first centuries Edited by Max Paddison and Irène Deliège, the book offers a wide range of international perspectives from prominent musicologists, philosophers and composers, including C. Léstin, Irène Deliège, Pascal Decroupet, Richard Toop, Rudolf Frisius, Alastair Williams, Herman Sabbe, François Nicolas, Marc Jimenez, Anne Boissière, Max Paddison, Hugues Dufourt, Jonathan Harvey and new interviews with Pierre Boulez, Brian Ferneyhough, Helmut Lachenmann and Wolfgang Rihm Part I is mainly theoretical, in emphasis Issues addressed include the historical rationalization of music and technology, new approaches to the theorization of atonal harmony in the wake of Spectralism, debates on the new complexity, the heterogeneity, pluralism and stylistic omnivorousness that characterizes music in our time and the characterization of twentieth-century and contemporary music as a search for lost harmony The orientation of Part II is mainly philosophical, examining concepts of totality and inclusivity in new music, raising questions as to what might be expected from an autonomous contemporary musical logic and considering

the problem of the survival of the avant garde in the context of postmodernist relativism As well as analytic philosophy and cognitive psychology critical theory features prominently with theories of social mediation in music new perspectives on the concept of musical material in Adorno's late aesthetic theory and a call for an aesthetics of risk in contemporary art as a means to reassert the essential role of criticism of judgment and of evaluation as necessary conditions to bring about a real public debate on the art of today Part III offers creative perspectives with new essays and interviews from important contemporary composers who have made highly significant interventions in the debates around music today both through their compositions and through their writings on music The contributions from Pierre Boulez Brian Ferneyhough Helmut Lachenmann Wolfgang Rihm and Jonathan Harvey and also the opening essay of the volume by the French spectralist composer and philosopher Hugues Dufourt address issues of chance control freedom intuition ambiguity technology time and meaning in contemporary music A concluding essay by Alastair Williams on advanced contemporary music and the Austro-German tradition post 1968 provides a postlude to the book while the whole collection is prefaced by an extended introductory chapter by Max Paddison which provides a context of ideas and traces many of the issues discussed back to Adorno's seminal notion of *une musique informelle*

Routledge Handbook to Luigi Nono and Musical Thought

Jonathan Impett, 2018-10-26 Of the post-war post-serialist generation of European composers it was Luigi Nono who succeeded not only in identifying and addressing aesthetic and technical questions of his time but in showing a way ahead to a new condition of music in the twenty-first century His music has found a listenership beyond the ageing constituency of contemporary music In Nono's work the audiences of sound art improvisation electronic experimental and radical musics of many kinds find common cause with those concerned with the renewal of Western art music His work explores the individually and socially transformative role of music its relationship with history and with language the nature of the musical work as distributed through text time technology and individuals the nature and performativity of the act of composition and above all the role and nature of listening as a cultural activity In many respects his music anticipates the new technological state of culture of the twenty-first century while radically reconnecting with our past His work is itself a case study in the evolution of musical activity and the musical object from the period of an apparently stable place for art music in Western culture to its manifold new states in our century Routledge Handbook to Luigi Nono and Musical Thought seeks to trace the evolution of Nono's musical thought through detailed examination of the vast body of sketches and to situate this narrative in its personal cultural and political contexts

Holistic Musical Thinking: A Pedagogical Model for Hands-On and Heart-Felt Musical Engagement Daniel C. Johnson, 2024-08-06 Holistic Musical Thinking presents a comprehensive view of how people engage with music from a hands on and heart felt perspective This approach embraces the teaching and learning processes as a multi dimensional amalgamation of knowing doing and feeling through musical experiences The result is a five dimensional model that synthesizes cognitive affective and psychomotor learning with curricular integration With pedagogical applications Holistic Musical Thinking offers a multi faceted perspective that benefits both music teachers and their students This innovative approach uses established research for a new model of musical thinking and taxonomy of musical engagement Complete with classroom vignettes and pedagogical strategies this book reframes musical thinking as a new direction in music education Written for music teachers teacher educators and their students this book provides practical applications of the multi dimensional Model of Holistic Musical Thinking for K 12 music education and beyond

Theology, Music, and Modernity Jeremy Begbie, Daniel K L Chua, Markus Rathey, 2021-02-02 Theology Music and Modernity addresses the question how can the study of music contribute to a theological reading of modernity It has grown out of the conviction that music has often been ignored in narrations of modernity s theological struggles Featuring contributions from an international team of distinguished theologians musicologists and music theorists the volume shows how music and discourse about music has remarkable powers to bring to light the theological currents that have shaped modern culture It focuses on the concept of freedom concentrating on the years 1740 1850 a period when freedom especially religious and political freedom became a burning matter of concern in virtually every stratum of Western society The collection is divided into four sections each section focusing on a key phenomenon of this period the rise of the concept of revolutionary freedom the move of music from church to concert hall the cry for eschatological justice in the work of black hymn writer and church leader Richard Allen and the often fierce tensions between music and language There is a particular concern to draw on a distinctively Scriptural imagination especially the theme of New Creation in order to elicit the key issues at stake and to suggest constructive ways forward for a contemporary Christian theological engagement with the legacies of modernity today
