Mathurin C. Hounnikpo,2016-04-22 The relationship between civil society and the armed forces is an essential part of any polity democratic or otherwise because a military force is after all a universal feature of social systems Despite significant progress moving towards democracy among some African countries in the past decade all too many African militaries have yet to accept core democratic principles regulating civilian authority over the military This book explores the theory of civil military relations and moves on to review the intrusion of the armed forces in African politics by looking first into the organization and role of the army in pre colonial and colonial eras before examining contemporary armies and their impact on society Furthermore it revisits the various

explanations of military takeovers in Africa and disentangles the notion of the military as the modernizing force Whether as a revolutionary force as a stabilizing force or as a modernizing force the military has often been perceived as the only organized and disciplined group with the necessary skills to uplift newly independent nations The performance of Africa s military governments since independence however has soundly disproven this thesis As such this study conveys the necessity of new civil military relations in Africa and calls not just for civilian control of the military but rather a democratic oversight of the security forces in Africa

Comparative Analysis Of Nations Robert Perry, 2019-03-01 The comparative method is fundamental and critical for political scientists and especially those interested in comparative politics Such questions as how democratic is the United States how rich is Germany and how ethnically complex is Nigeria and what effects these attributes have on important political phenomena cannot be analyzed except comparatively To understand politics we need to think in terms of concepts processes behavior and authority patterns that transcend specific regions or nation states Comparative Analysis of Nations is designed to address three questions confronting the study of politics 1 What do I do once I have identified a question that I want to explore within a cross national perspective 2 How do I proceed so I adequately address this question 3 Why should I proceed with this particular study plan Perry and Robertson examine how to conceptualize operationalize measure sample analyze and evaluate these research questions In clear language they stress the logic behind basic techniques of quantitative analysis issues of measurement and hypothesis testing basic techniques of hypothesis testing tabular analysis ANOVA scatterplots bivariate regression and advanced bivariate analysis curvilinear and multiple regression The book requires no previous training in statistics or math Cross national data sets accompany the book on a CD ROM and are compatible with the popular SPSS package The data sets enable the instructor the opportunity to engage the students directly in devising their own modified models of analysis to complement and extend the demonstrations within the text In sum the text integrates the core tools and strategies of social science analysis within a framework that highlights the quantitative study of comparative politics

Democratization Without Representation Kenneth C. Shadlen, 2007-08-09 When countries become more democratic new opportunities arise for individuals and groups to participate in politics and influence the making of policy But democratization does not ensure better representation for everyone and indeed some sectors of society are ill equipped to take advantage of these new opportunities Small industry in Mexico Kenneth Shadlen shows is an excellent example of a sector whose representation decreased during democratization Shadlen s analysis focuses on the basic characteristics of small firms that complicate the process of securing representation in both authoritarian and democratic environments He then shows how increased pluralism and electoral competition served to exacerbate the political problems facing the sector during the course of democratization in Mexico These characteristics created problems for small firms both in acting collectively through interest associations and civil society organizations and in wielding power within political parties The changes that democratization effected in the structure of corporatism put small industry at a significant

disadvantage in the policy making arena even while there was general agreement on the crucial importance of this sector in the new neoliberal economy especially for generating employment The final chapter extends the analysis by making comparisons with the experience of small industry representation in Argentina and Brazil Shadlen uses extensive interviews and archival research to provide new evidence and insights on the difficult challenges of interest aggregation and representation for small industry He conducted interviews with a wide range of owners and managers of small firms state and party officials and leaders of business associations and civil society organizations He also did research at the National Archives in Mexico City and in the archives of the most important business organizations for small industry in the post World War II period

*Media Reforms and Democratization in Emerging Democracies of Sub-Saharan Africa* Ufuoma Akpojivi, 2018-04-03 This book examines the media reform processes and re democratization projects of Ghana and Nigeria s emerging democracies It evaluates and critiques these reform processes arguing that because of dependency approaches resulting from the transplanting of policy framework from the West into these emerging democracies the policy goals and objectives of the reforms have not been achieved Consequently the inherent socio cultural economic and political factors coupled with the historical antecedents of these countries have also affected the reform process Drawing from policy documents analyses and interviews Ufuoma Akpojivi argues that the lack of citizens active participation in policy processes has led to neo liberalization and the continued universalization of Western ideologies such as democracy media freedom and independence Akpojivi posits that the recognition of socio cultural political and economic factors inherent to these emerging democracies coupled with the communal participation of citizens will facilitate true media reform processes and development of these countries

**Competitive Authoritarianism** Steven Levitsky, Lucan A. Way, 2010-08-16 Based on a detailed study of 35 cases in Africa Asia Latin America and post communist Eurasia this book explores the fate of competitive authoritarian regimes between 1990 and 2008 It finds that where social economic and technocratic ties to the West were extensive as in Eastern Europe and the Americas the external cost of abuse led incumbents to cede power rather than crack down which led to democratization Where ties to the West were limited external democratizing pressure was weaker and countries rarely democratized In these cases regime outcomes hinged on the character of state and ruling party organizations Where incumbents possessed developed and cohesive coercive party structures they could thwart opposition challenges and competitive authoritarian regimes survived where incumbents lacked such organizational tools regimes were unstable but rarely democratized
