Gibbs, Philip A. Grey,2006-10-01 Five Foundations of Human Development FFHD Is our Materially Driven Life a Threat to the Spiritual Purpose of our Existence The book is a philosophical religious and practical discourse on Five Foundations of Human Development It offers compelling philosophical analytical and empirical arguments for a better world which is inherent in the worship of God service to humanity obedience to governing authorities and management of God's creation The authors examine problems that we encounter daily and they postulate solutions from Spiritual moral social intellectual and physical perspectives They essentially explore some of our past and present approaches to solutions to human problems They propose new revolutionary

approaches to human development that call the reader's attention to a new enlightenment, new hope and new optimism informed by a new Body of knowledge. The authors strive to explain the Christian message of God as delivered and taught by Jesus Christ; however, it is not a work that is exclusively for Christians. Their discourse recognizes the comparable message and desire for the unity of humanity by other world religions. They present their discourse not as experts or giving expert advice but simply as individuals with a desire to add another dimension of thought and enquiry to the vast storehouse of human knowledge. The primary purpose of their discourse is to demonstrate the positive benefits to humanity when Biblical religious perspectives underpin every human endeavor. These endeavors include but are not limited to family relations, national and international relations, engineering, science and technology, economics, history, education and health. These endeavors dictate human progress. Gibbs and Grey contend that humanity can realize the greater ideals of leadership and authority in the world through the application of the teachings of Jesus Christ and the great prophets. The authors appeal to leaders of the 21st century—educational, political, scientific and business—to seek the knowledge, wisdom and understanding of God in using our vast global natural wealth, science, technology and human capital to educate relevant and applicable strategies for the betterment of all humanity. Genre: Christianity, Religion, Inspirational, Religion, Enlightenment, Philosophy, General.

**National Union Catalog**, Includes entries for maps and atlases. **Methodologies in Peace Psychology** Diane Bretherton, Siew Fang Law, 2015-09-03. This volume looks at research methods through the lens of peace studies and peace values. Apart from reviewing established methods from peace psychology, it presents some innovative ideas for conducting research in the area of peace psychology. Many of these methods are drawn from the field from activities used by active peace practitioners. A critical component of this volume is its core argument that peace research should be conducted by peaceful means and should model peaceful processes. Organized thematically, the volume begins with a review of the established best practices in peace psychology research methodology, including methods for qualitative research, for quantitative research and participative action networks. In doing so, it also points to some of the limitations of working for peace within the tradition of a single discipline and to the need to expand psychology methodology to methodologies. Therefore, the second half of the volume proceeds to explore the realm of innovative, relatively unorthodox research methods such as participatory and workshop methods, the creative arts and sports for research purposes. The use of new advances in information technology to conduct peaceful research are also discussed. The concluding chapters synthesize key issues from the previous chapters and link peace psychology with ideas and implementation of research designs and practices. Finally, it discusses the nature of academic knowledge and more specifically academic knowledge in peace psychology and where that fits into the mission to build a more peaceful world. Overall, this book aims to provide peace psychologists with an array of possibilities and best practices for approaching their research. Many researchers find the experience of doing research a somewhat lonely, if not isolating experience. *Methodologies in Peace Psychology: Peace Research by Peaceful Means* aims to

alleviate this feeling as the use of these more innovative methods leads to a closer engagement with the community and a much more social experience of research This volume is a useful tool for both new and experienced researchers because it provides leads for idealistic young researchers who want their work to make a difference in addition to encouraging more reflection and analysis for experienced peace psychologists

Pathway to Freedom Alistair Begg, 2015-02-23 God's code of conduct is as relevant and insistent today as it's always been The landscape of contemporary society reveals that we neither know nor care much about the Law of God There is a general lawlessness in the lives of professing Christians An absence of the fear of God in public worship and private living A growing confidence in ourselves and doubt concerning God and His Word Amidst this moral crisis the message of the Ten Commandments can give us order direction and hope With dynamic implications for how each of us lives every day Pathway to Freedom will challenge you to think long and hard about the significance of God's Law We have entered into a time of moral crisis in our culture and in the church as well Stories about divorce adultery and the individualized picking and choosing of doctrines abound Pathway to Freedom is forthright and necessary teaching that today's church cannot afford to ignore How now shall we live The beginning of the answer must be in obedience to God's moral law summarized in the Ten Commandments
