P. Clarke,Thomas A. O'Donoghue,2013-07-18 How do different contexts influence the nature and character of school leadership This book is predicated on the simple yet profound observation that school leadership can only be understood within the context in which it is exercised The observation is particularly valid in relation to post conflict societies especially when they have eventuated from new wars Schools in these contexts face highly complex circumstances and a level of environmental turbulence requiring different kinds of leadership from those operating in less complicated and relatively stable situations By assembling an impressive array of international experts this book investigates a much neglected area of research Each chapter highlights the importance of context for understanding the realities of school leadership and reveals the challenges and influences that school leaders face as well as the strategies they adopt to deal with the complexities of their work In particular valuable insights are provided into how intractable problems faced by schools can affect student professional and organizational learning agendas There are also important glimpses of the progression that can be made in schools by Enhancing the curriculum Energizing teaching capacity and Optimising leadership capacity Depictions of post new war environments include Angola Ghana Sri Lanka Rwanda Kenya Solomon Islands Lebanon Kosovo Timor Leste and Northern Ireland The book will be key reading for undergraduate and postgraduate students studying educational leadership comparative education and education policy **Assessing Student Learning in Africa** Thomas Kellaghan,Vincent Greaney,2004-01-01 This title reviews four aspects of educational assessment public examinations national assessment international assessment and classroom assessment and offers suggestions for using different forms of assessment to enhance student learning The Management of Common Property Natural Resources Daniel W. Bromley,Michael M. Cernea,1989 This popular technical paper is currently in its sixth reprinting 10 97 Many development projects require that people be involuntarily resettled to other locations to live and work Governments need adequate policies to minimize the negative effects of this relocation both on the individuals involved and on the national economy This report presents policy

guidelines and procedures for World Bank financed projects requiring involuntary resettlement Designed for development specialists social anthropologists and sociologists this volume discusses past Bank projects to illuminate the responsibilities of the governments and the needs of resettlers and host populations during resettlement Among the topics addressed are types of involuntary resettlement basic sociological principles in approaching resettlement policy objectives and strategies reconstruction of the resettlers homes production bases and social organizations and the effects of resettlement on the environment Annexes to this report contain technical checklists for preparing and appraising resettlement plans in projects and for monitoring and evaluating rettlement Michael M Cernea has published and editied several books on the sociological aspects of development Among these books is Putting People First Sociological Variables in Rural Development which describes culturally sensitive approaches to the preparation planning and implementation of development projects Other books include Social Organization and Development Anthropology Social Assessments for Better Development Case Studies in Russia and Central Asia and Urban Environment and Population Relocation *School Improvement for Real* David Hopkins,2003-09-02 As societies continue to set educational goals that are on current performance beyond the capacity of the system to deliver strategies for enhancing student learning through school and classroom intervention have become increasingly important Yet as David Hopkins argues in his book many of the educational initiatives recently developed under the umbrella of school improvement are inadequate or unhelpful Simply blaming teachers and delegating financial responsibility he maintains has little positive impact on classroom practice This is the bleak context within which school improvement has to operate today School Improvement for Real offers a genuine alternative a strategy for educational change that focuses on student achievement by modifying classroom practice and adapting the management arrangements within the school to support teaching and learning It outlines an approach to school improvement that has a medium term systemic orientation providing both principles and suggestions for better practice The author s experience in the field of school improvement ensures that the text is informed by a practical wisdom that is so often lacking from the more typical managerial texts on improvement and effectiveness School Improvement Zijian Li,Michael Williams,2006 School improvement is at the centre of educational reform and is perceived by many as a key to social and economic advance It contributes to determining the personal fulfilment and career paths of individual students and consequently engages the interest of parents and community members It is an ever present commitment of teachers and managers in schools Policy makers and politicians at international national and local levels devote much time and effort to their search for better schools School improvement has also attracted the attention of researchers and scholars in many countries They have been drawn from various disciplines and fields within the educational studies community including psychology sociology history evaluation and studies in curriculum and assessment There is now an established body of findings from studies conducted in many contexts This book brings together leading experts drawn from many countries and several continents reflecting

diverse approaches to educational policy and practice evaluation and research Variations between countries and between local communities within countries are highlighted The possibilities and difficulties inherent in transferring evidence from one educational system at a number of levels to another are clearly discussed What emerges from the cross national and cross cultural evidence are several significant threads currently under active investigation including school structure and management classroom organisation school leadership teacher training and staff development curriculum and assessment community involvement lifelong learning and special provision for students with special educational needs School Improvement International Perspectives is written for national educational policy makers teachers and student teachers governing bodies and parents from various levels of schooling and university researchers and scholars
