values the role of all stakeholders *Non-profit Governance* Guillaume Plaisance, Anne Goujon Belghit, 2024-08-29 Non profit Governance offers 12 perspectives and analytical frameworks to facilitate the development of governance in non profit organisations NPOs In this sector governance is all the more important because it is often voluntary Organisations therefore need to be supported in their management accountability and strategy International standards in particular ISO 37000 2021 dedicated to the governance of organisations propose key principles to ensure value creation around stakeholder engagement leadership risk governance social responsibility and organisational sustainability This book proposes to explore and adapt these principles to the non profit sector To do this the book focuses on four facets of governance the controls it puts in place the stakeholders it must listen to and manage the performance it must monitor and finally the people it must lead and mobilise The book also highlights the interest of governance mechanisms and processes in developing effective performance ethics in NPOs and responsible management Each chapter therefore takes one or more of the principles of ISO 37000 2021 in the non profit context and builds an analytical framework around them These 12 frameworks can thus be used by the organisations themselves to develop their governance practices and by researchers who will find original approaches to incorporate into their studies **The University Next Door** Mark Schneider, KC Deane, 2015-04-28 The challenges public comprehensive universities face today are expanding they have been challenged to enroll and graduate more students adopt new technologies that lower cost without sacrificing quality and align program and curricular offerings with the skills that employers require While these universities have a long history of adapting to change today s environment will likely test the capabilities of even the most adaptive institutions This volume assembles a team of experts from a variety of disciplines to examine both the history of the comprehensive university and what lies ahead Overall the book grapples with such questions as How do these institutions adapt to serve the growing population of non traditional students How well do they prepare graduates for the labor market Can partnerships between community colleges and comprehensive universities bolster student success The University Next Door draws much needed attention to a set of institutions that has historically received little notice yet play an important role in meeting our new attainment goals and helping the American economy grow Book Features Examines the role of comprehensive universities from start to finish their history and future Uses empirical analysis to explore complex questions about which students choose these universities and why Explores how these institutions might struggle under a federal ratings system such as the one proposed by President Obama Discusses how these institutions can better monitor the needs of the economy and better educate students to fill those needs Provides recommendations to inform future decisions about higher education policy In chapter after chapter the contributors critically assess whether comprehensive universities can respond to the nation s ambitious call to action This compelling volume is a valuable starting point for anybody concerned about the future of the institutions that help define American higher education as we know it today Richard G Rhoda executive director Tennessee Higher Education Commission Schneider Deane provides much needed

Pathways Out of Poverty During An Economic Crisis C. Peter Timmer,Neil McCulloch,2007 Most poor people in developing countries still live in rural areas and are primarily engaged in low productivity farming activities Thus pathways out of poverty are likely to be strongly connected to productivity increases in the rural economy whether they are realized in farming in rural nonfarm enterprises or by way of rural urban migration The authors use cross sectional data from the Central Statistical Board for 1993 and 2002 as well as a panel data set from the Indonesia Family Life Survey for 1993 and 2000 to show which pathways out of poverty were most successful over this period The findings suggest that increased engagement of farmers in rural nonfarm enterprises is an important route out of rural poverty but that most of the rural agricultural poor that exit poverty still do so while remaining rural and agricultural So changes in agricultural prices wages and productivity still play a critical role in moving people out of poverty
