Ameh, Stephen W. Bickler, Kokila Lakhoo, Benedict C. Nwomeh, Dan Poenaru, 2020-11-23

The second fully updated edition of this book applies and contextualizes up to date information on pediatric surgery for low and middle income countries LMICs The book is organized in general anatomic and thematic sections within pediatric surgery such as urology oncology orthopedics and gastroenterology and includes chapters addressing the unique challenges and approaches for pediatric surgery in low resource settings Each chapter has dual authorship LMIC author providing context specific insights and authors from high income countries HICs contributing experience from well resourced settings Written in a reader friendly format this book has a uniform structure in each chapter with introduction demographics etiology pathophysiology clinical presentations investigations management outcome prevention ethics evidence based surgery and references This comprehensive volume fills the gap between up to date pediatric surgical scholarship and knowledge developed and applied in HICs and the practical needs of practitioners in low resource settings This is an indispensable guide for postgraduate surgical trainees in Africa and other LMICs as well as general surgeons practicing in Africa and other LMICs who need to care surgically for children Hemostasis Management of the Pediatric Surgical Patient Nina A. Guzzetta, David Faraoni, Cassandra D. Josephson, 2023-10-19

Hemostasis Management of the Pediatric Surgical Patient provides knowledge on the emerging area of pediatric hemostasis and its management It discusses aspects of perioperative blood management in the pediatric population including how to accurately estimate and monitor bleeding and determine optimal treatment regimens for bleeding in pediatric surgical patients It also provides information on the implementation of intraoperative blood conservation strategies goal directed transfusion therapy and postoperative estimation of bleeding and thrombotic risks This book is a valuable resource to pediatric practitioners and researchers who need comprehensive information on pediatric hematology from basic physiology to pre intra and postoperative care of pediatric patients The coagulation system of children evolves with age as evidenced by marked physiological differences in the concentration of hemostatic proteins between children of different age

groups and adults Consequently there are distinct differences in hemostatic management between adult and pediatric patients Covers essential concepts in hemostasis indicating instances where pediatric and adult data conflict along with foundational information on disorders of hemostasis in children and blood bank management for pediatric patients Concisely covers specifics of perioperative hemostatic management in neonates and children including bedside monitoring of coagulation and goal directed treatment of coagulopathy Discusses hemostatic management in the entire perioperative period from preoperative assessment until discharge from the hospital
