Patient Choice Org:

Patient Choice Org Weller,1997-07 This special report describes the emerging contours of and the factors that are driving the move to the next generation after capitation and managed care called here Patient Choice Organizations PCOs The report has its origins in the author s paper for the Federal Trade Commission FTC Hearings in the fall of 1995 *Health Care Provision and Patient Mobility* Rosella Levaggi,Marcello Montefiori,2013-12-11 Patient mobility across Europe is markedly increasing and new generations will actively ask to be treated by the health care system that best meets their needs At a political level the EU issued the EU Directive no 24 2011 CE of 9th March 2011 concerning the application of patients rights in cross border health care and has contributed to improving the level of freedom of choice for the European citizen but it does not seem to have increased actual patient mobility across Europe Freedom to choose is necessary to grant the people of Europe the same access to public sector health care services The latter is a key instrument for an efficiently functioning single market ensuring real mobility within the EU The aim of this book is to study the current European health care market and discuss the hypothesis of a European right of citizenship with reference to health care services It examines patients mobility from several perspectives determinants of patient mobility governance of cross border mobility at EU level as concerns patients and health care professionals policy implications and case studies It is intended for health researchers decision makers and professionals concerned with health care provision and patient mobility The goal is to provide through scientific and methodological rigor new informative tools useful for the implementation of new policies in the health care sector in order to implement effective health care integration in the European Union The Affordable Care Act Purva H.
