Patient Compliance With And Attitudes Towards Health Buddy:

Patient Compliance With and Attitudes Towards Health Buddy, 2000 This report discusses patient acceptance of a device called Health Buddy TM Placed in the home of a chronically ill patient in our example one with congestive heart failure or CHF this device enables two way communication between the patient and a care provider in a case management program Health Hero Inc the company that developed the Health Buddy TM and offers the communication service based on it writes The service is designed to give care providers the frequent communication and baseline data that yield more opportunities to identify potentially serious situations sooner help caregivers focus their attention on those who need it most and enable them to motivate and educate their patients Communication occurs via Health Buddy TM when the patient responds to a short automated survey of perhaps a dozen questions This is in contrast to most case management programs where the case manager usually a nurse takes the initiative by telephoning the patient Accordingly the patient s acceptance of Health Buddy TM and his or her willingness to use it daily is crucial to its success This report should be of interest to any who contemplate establishing case management programs for chronically ill patients Examples may be found in hospitals independent practice associations and health maintenance organizations it should also interest those who like Health Hero offer services in support of case management programs Funding for this work was provided by Health Hero *Patient Compliance with and Attitudes Towards Health Buddy* James H. Bigelow, Shan Cretin, Matt Solomon, Shin-Yi Wu, Julie C. Cherry, Herb Cobb, Michael O'Connell, 2000 This report addresses patient acceptance of a new device called a Health Buddy used to communicate between patients chronically ill with congestive heart failure and a health care provider usually a nurse in a case management programme **Journal of Rehabilitation Research & Development**, 2010 Journal of Rehabilitation Research and Development, 2010

Communication and Aging Research Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging The Routledge Companion to Media and Risk Bishnupriya Ghosh, Bhaskar Sarkar, 2020-02-26

This collection presents new work in risk media studies from critical humanities perspectives Defining historicizing and consolidating current scholarship the volume seeks to shape an emerging field signposting its generative insights while examining its implicit assumptions When and under what conditions does risk emerge How is risk mediated Who are the targets of risk media Who manages risk Who lives with it Who are most in danger Such questions the what how who when and why of risk media inform the scope of this volume With roots in critical media studies and science and technology studies it hopes to inspire new questions perspectives frameworks and analytical tools not only for risk media and communication studies but also for social and cultural theories Editors Bishnupriya Ghosh and Bhaskar Sarkar bring together contributors who elucidate and interrogate risk media's varied histories and futures This book is meant for students and scholars of media and communication studies science and technology studies and the interdisciplinary humanities looking either to deepen

their engagement with risk media or to broaden their knowledge of this emerging field

Handbook of Psychology and Health, Volume IV Shelley E. Taylor, Jerome E. Singer, Andrew Baum, 2020-09-10 Originally published in 1984 the study of psychological aspects of health was a rapidly expanding enterprise Most of the contributors to this volume were trained as social psychologists or by social psychologists Some have been more applied in their focus or on the edge of several fields All however share a common approach focusing on the individual as he or she is buffeted about by social forces and copes with these forces All consider situational and psychological factors in the determination of behavior emotion or cognition and all apply their expertise to the study of health related issues The grouping of the chapters in this volume by the authors subspecialty social psychology is a somewhat unconventional method of clustering Ordinarily the materials presented here would be published in journals or texts concerned with behavior or psychosocial in health and medicine or in specialty publications dealing with a particular disease or health issue That clustering of articles is functional in providing information to those most likely to utilize it but it diffuses the origin and background of the studies These chapters speak to the diversity of health issues that are amenable to successful social psychological analysis
