*Treatments* Lisa Diedrich, Creative expression inspired by disease has been criticized as a celebration of victimhood unmediated personal experience or just simply bad art Despite debate however memoirs written about illness particularly AIDS or cancer have proliferated since the late twentieth century and occupy a highly influential place on the cultural landscape today In *Treatments* Lisa Diedrich considers illness narratives demonstrating that these texts not only recount and interpret symptoms but also describe illness as an event that reflects wider cultural contexts including race gender class and sexuality Diedrich begins this theoretically rigorous analysis by offering examples of midcentury memoirs of tuberculosis She then looks at Susan Sontag's *Illness As Metaphor* Audre Lorde's *The Cancer Journals* and Eve Kosofsky Sedgwick's *White Glasses* showing how these breast cancer survivors draw on feminist health practices of the 1970s and also anticipate the figure that would appear in the wake of the AIDS crisis in the 1980s the politicized patient She further reveals how narratives written by doctors Abraham Verghese and Rafael Campo about treating people with AIDS can disrupt the doctor patient hierarchy and she explores practices of witnessing that emerge in writing by Paul Monette and John Bayley Through these records of intensely personal yet universal experience Diedrich demonstrates how language both captures and fails to capture these scenes of loss and how illness narratives affect the literary medical and cultural contexts from which they arise Finally by examining the ways in which the sick speak and are spoken for she argues for an ethics of failure the revaluation of loss as creating new possibilities for how we live and die Lisa Diedrich is assistant professor of women's studies at Stony Brook University

*Chasing My Cure* David Fajgenbaum, 2021-01-26 NATIONAL BESTSELLER An extraordinary memoir that belongs with Atul Gawande's writings and *When Breath Becomes Air* Adam Grant New York Times bestselling author of *Originals* When a young doctor is diagnosed with a rare disease he spearheads the search for a cure and becomes a champion for a new approach to medical research

David Fajgenbaum a former Georgetown quarterback was nicknamed the Beast in medical school where he was also known for his unmatched mental stamina But things changed dramatically when he began suffering from inexplicable fatigue In a matter of weeks his organs were failing and he was read his last rites Doctors were baffled by his condition which they had yet to even diagnose Miraculously Fajgenbaum survived only to endure repeated near death relapses from what would eventually be identified as a form of Castleman disease an extremely deadly and rare condition that acts like a cross between cancer and an autoimmune disorder Realizing that the medical community was unlikely to make progress in time to save his life Fajgenbaum turned his desperate hope for a cure into concrete action Between hospitalizations he looked for clues that could unlock a new treatment and reached out to other Castleman disease patients and physicians Instead of waiting for the scientific stars to align he would attempt to align them himself More than five years later and now married to his college sweetheart Fajgenbaum has seen his hard work pay off A treatment he identified has induced a tentative remission and his novel approach to collaborative scientific inquiry has become a blueprint for advancing rare disease research His incredible story demonstrates the potency of hope and what can happen when the forces of determination love family faith and serendipity collide
