**Patsy Adam Smith's Romance of Australian Railways** Rev. P. A. Smith,1973      Patsy Adam Smith's Romance of Australian Railways Patsy Adam-Smith,1974      **Blood, Iron, and Gold** Christian Wolmar,2010-03-02 The opening of the world's first railroad in Britain and America in 1830 marked the dawn of a new age. Within the course of a decade tracks were being laid as far afield as Australia and Cuba and by the outbreak of World War I the United States alone boasted over a quarter of a million miles. With unrelenting determination, architectural innovation and under gruesome labor conditions a global railroad network was built that forever changed the way people lived. From Panama to Punjab from Tasmania to Turin Christian Wolmar shows how cultures were enriched and destroyed by one of the greatest global transport revolutions of our time and celebrates the visionaries and laborers responsible for its creation.

**Railways** Christian Wolmar,2019-12-12 From Britain's most popular railway historian a concise authoritative and fast paced telling of how the railways changed the world. The arrival of the railways in the first half of the nineteenth century and their subsequent spread across every one of the world's continents acted as a spur for economic growth and social change on an extraordinary scale. The iron road stimulated innovation in engineering and architecture enabled people and goods to move around the world more quickly than ever before and played a critical role in warfare as well as in the social and economic spheres. Christian Wolmar describes the emergence of modern railways in both Britain and the USA in the 1830s and elsewhere in the following decade. He charts the surge in railway investment plans in Britain in the early 1840s and the ensuing railway mania which created the backbone of today's railway network and the unstoppable spread of the railways across Europe, America and Asia. Above all he assesses the global impact of a technology that arguably had the most transformative impact on human society of any before the coming of the Internet and which as it approaches two centuries of existence continues to play a key role in human society in the twenty first century. A lucid and engaging account of the far reaching effects that trains have had upon society. The Railway Canal Historical Society.

**Australian Folklore** ,2001      **Consumer Australia** Robert Crawford,Kim Humphery,Judith Smart,2010-06-09 Donald Horne's *The Lucky Country* claimed that Australia was one of the first nations to find part of the meaning of life in the purchase of consumer goods. Significantly similar views had been expressed in the late 18th century where everyday life in the antipodean outpost of Empire was regarded as being pecuniary and acquisitive in nature. While references to Australia as a consumer society continue to be made the question of how Australia came to be so has attracted less attention. The chapters in *Consumer Australia* actively redress this omission by examining the ways in which the processes of selling, buying and exchanging have characterised the experiences of consumption in every day Australian life. Prepared by leading and emerging scholars the chapters in this unique collection critically explore the different ways that Australians have consumed products, brands and even consumption itself from the 19th century and through the 20th century. By charting the growth and development of consumption in Australia *Consumer Australia* reveals

how Australia came to be a consumer society and asks where it is headed      The Iron Road Christian Wolmar,2014-05-01

The Iron Road is full of wondrous curiosities Did you know that early trains in Australia were pulled by convicts or that elephants were until recently used to shunt freight wagons in India The world s most magnificent railway station the Chhatrapati Shivaji terminal in Mumbai took 10 years to build The longest possible continuous railway journey in the world is the 10 600 miles between Algeciras in Spain and Ho Chi Minh City in Vietnam And the idea that Mussolini made the trains run on time is a myth No invention not even the Internet has ever transformed the way the world traveled worked thought fought ate drank made love you name it the way the train did From the historic moment in September 1830 when the first train chuffed between Liverpool and Manchester UK there was a race to lay down tracks across the planet Adventurers visionaries and rogues were attracted to grandiose projects linking distant corners of the globe in a quest for wealth power and national unity The achievements were heroic India s railway network was the biggest public works project since the building of the pyramids But the human costs were huge In the 1850s six thousand workers died during the construction of the Panama railway the world s first transcontinental line 120 for each mile of railroad The cadavers were pickled and sold to medical schools around the world to defray costs But for the shareholders there were fortunes to be made and at their peak the railroads represented luxury almost beyond belief The Iron Road tells of great invention grand vision mind boggling engineering military strategy colonial ambition groundbreaking trade changes and social impact all the ways that railroads utterly changed the world in which we live      Journal of the Royal Australian Historical Society Royal Australian Historical Society,1975 Includes the Society s Annual report and statement of accounts      **Catalog of Copyright Entries.
