Schwartz,2005-09-30 Children learn mathematics most effectively in contexts that are meaningful to them Realizing the potential of these contexts for fostering young children s mathematical learning while nurturing and challenging them requires knowledge of mathematics as well as of child development Avoiding the debates surrounding hands on learning vs direct instruction the author focuses on the value of different contexts for learning and illustrates ways to genuinely engage children as active learners The work is rich with examples of children s interactions with each other and with adults as they utilize and extend their understanding of

mathematics Examples and guidelines for developing lessons and activities will be useful to educators and parents Chapters explore how we underestimate young children s mathematical capabilities how appropriate sequencing of learning and building on prior knowledge will enhance understanding what teachers including parent teachers need to know and high stakes testing This is a work that brings together the connections between knowing the basics and constructing knowledge in accessible and practical ways **Resources in Education** ,1982-10 **Instructor** ,2005 Mathematics Education in the Early Years Martin Carlsen,Ingvald Erfjord,Per Sigurd Hundeland,2020-03-13 This book gives insights in the vivid research area of early mathematics learning The collection of selected chapters mirrors the research topics presented at the fourth POEM conference in May 2018 Thematically the volume reflects the importance of this evolving area of research which has begun to attract attention in the spheres of education and public policy due to increased interest in early years learning The research foci of the chapters comprise children s mathematical reasoning early years mathematics teaching and the role of parents for children s mathematical development The 2018 conference included a wider range of researchers than previous years **Going Green Grades PreK-K** Traci Geiser,2010-03 This book is packed full of ideas for reusing everyday items to create learning activities games group projects and artistic crafts All the lessons are aligned to standards and benchmarks Children are encouraged to reduce reuse and recycle Parents are asked to get involved too

Reconceptualizing Early Mathematics Learning Lyn D. English,Joanne T. Mulligan,2013-05-09 This book emanated primarily from concerns that the mathematical capabilities of young children continue to receive inadequate attention in both the research and instructional arenas Research over many years has revealed that young children have sophisticated mathematical minds and a natural eagerness to engage in a range of mathematical activities As the chapters in this book attest current research is showing that young children are developing complex mathematical knowledge and abstract reasoning a good deal earlier than previously thought A range of studies in prior to school and early school settings indicate that young learners do possess cognitive capacities which with appropriately designed and implemented learning experiences can enable forms of reasoning not typically seen in the early years Although there is a large and coherent body of research on individual content domains such as counting and arithmetic there have been remarkably few studies that have attempted to describe characteristics of structural development in young students mathematics Collectively the chapters highlight the importance of providing more exciting relevant and challenging 21st century mathematics learning for our young students The chapters provide a broad scope in their topics and approaches to advancing young children s mathematical learning They incorporate studies that highlight the importance of pattern and structure across the curriculum studies that target particular content such as statistics early algebra and beginning number and studies that consider how technology and other tools can facilitate early mathematical development Reconceptualising the professional learning of teachers in promoting young children s mathematics including a consideration of the role of play is also addressed
