One Couple, Four Realities Richard Chasin, Henry Grunebaum, Margaret Herzig, 1992-03-01 An outgrowth of an Harvard Medical School Couple Therapy Conference this is the first book on couple and family therapy to combine a range of clinical theories with a single case discussion At the conference Jim Framo Peggy Papp Norman Paul and Carlos Sluzki therapists well known for their differing styles and theoretical persuasions described and explained the sessions they each conducted with the same couple These sessions varied greatly each has a distinctive focus two included family of origin members one involved a co therapist Later other therapists representing an even broader range of perspectives discussed their viewpoints and speculated how they might have approached the same case In ONE COUPLE FOUR REALITIES MULTIPLE PERSPECTIVES ON COUPLE THERAPY the experience of attending this conference is recreated and expanded The reader is first given the same background information about the couple that was supplied to the interviewers and is then presented with edited transcripts and commentary by Framo Papp Paul and Sluzki about their own sessions Further perspectives and approaches to the case are provided by a number of other teachers of therapy Thus the reader is invited to view the couple from over a dozen different perspectives including psychodynamic object relations systemic behavioral feminist contextual and eclectic orientations Perhaps the most fascinating perspective is provided by the couple Larry and Jennifer who in the last section of the book detail their reactions to the four demonstration sessions Their stunningly candid and intelligent accounts given soon after the original interviews and then again six years later provide a compelling conclusion to the book Most published cases are selected retrospectively to illustrate the power of the author's approach By contrast this couple was selected in advance their case ongoing at the time in a Boston clinic seemed suitable for the demonstration interviews to be videotaped for the Harvard conference The couple was bright and engaging They and their families of origin were willing to participate The interviewers agreed to document the sessions no matter how they turned out This prospective method of case selection lent authenticity to the interviews permitting the viewers and now the reader to witness clinical work as it might unfold in the office of any therapist This volume is not intended to and does not demonstrate the superiority of one approach over another Each of the four demonstration interviews represents careful conscientious work and each leads to a different reality about the couple Only in a volume such as this can one see in high relief what each approach brings to light and what each obscures All therapists interested in couples should find this book useful as it stimulates readers to scrutinize their own theories and practices consider how they might have approached Larry and Jennifer and ponder what their own viewpoint

may have caused them to overlook Clinicians will appreciate the theoretical discussions and case analyses The book is a natural supplemental text for courses in couple or family therapy Teachers may learn much from the appendix which addresses ethical and therapeutic aspects of using videotaped demonstration interviews important issues that have been neglected in the professional literature The book may also have personal resonance for non professionals interested in exploring the complexity of one couple s relationship All will find ONE COUPLE FOUR REALITIES accessible and thought provoking Through the lives of Larry and Jennifer it addresses timeless and timely questions about the personal familial and cultural forces that create shape and strain the bonds that hold couples together *Stress in Psychotherapists* Ved P Varma,Ved Varma,2003-09-02 Highlights the pressures experienced by psychotherapists and examines how the effects vary according to the problems they treat the settings in which they work and their professional and personal development

Resource Focused Therapy Bradford Keeney,Wendel A. Ray,2018-03-26 For some time the family therapy field has been moving away from a problem based approach to work with clients Ideas such as creating a new family story focusing on strengths and solutions and making contracts with family members have all shifted interest toward a new approach to therapy The authors have been in the forefront of this thinking for several years and they have been experimenting with their ideas by working together with clients in order to create their own coherent effective model for therapy Resource Focused Therapy is the result Social Work with Adults Martin Brett Davies,2012-03-20 This best selling book explores the crucial role of social workers in securing a better future for vulnerable and disadvantaged adult service users Tackling the problems most common to this branch of social work it focuses on four major themes personalization mental health substance use and old age Edited by the highly respected Martin Davies and with contributions from some of the leading names in the field Social Work with Adults provides a clear map and guidance to help navigate between the different elements of social work knowledge and practice Whether a student on an undergraduate degree taking a module on working with adults or a qualified professional wanting to ensure they are providing the very best service they can this is essential reading The breadth and depth of coverage makes this text a perfect handbook for students of adult social work
