

AP Human Geography: Cultural Patterns and Processes Notes

Introduction

Cultural patterns and processes play a crucial role in shaping the identity, beliefs, and behaviors of societies around the world. Understanding these aspects is essential in studying human geography. In this section, we will delve into the examination of cultural traits, diffusion of ideas, language, religion, and popular culture, exploring how they impact societies and contribute to cultural diversity.

Cultural Traits

Cultural traits refer to the specific customs, traditions, behaviors, and artifacts that are characteristic of a particular group or society. These traits encompass a wide range of aspects, including clothing styles, food preferences, music, dance forms, art, architecture, and social norms. Cultural traits are passed down from one generation to another through socialization, and they contribute to the unique identity of each culture.

It is important to note that cultural traits can vary both within and between societies. Subcultures, for instance, develop within larger cultures and possess distinct traits that differentiate them from the dominant culture. Examples include ethnic or religious subcultures, which have their own customs and practices.

Diffusion of Ideas

The diffusion of ideas refers to the spread of cultural traits, innovations, and knowledge from one society to another. This process can occur through various means, including migration, trade, communication technologies, and media. Diffusion plays a significant role in shaping cultural landscapes and promoting cultural exchange.

Transmission in Anthropology Roy Ellen, Stephen J. Lycett, Sarah E. Johns, 2013-08-01 The concept of cultural transmission is central to much contemporary anthropological theory since successful human reproduction through social systems is essential for effective survival and for enhancing the adaptiveness of individual humans and local populations Yet what is understood by the phrase and how it might best be studied is highly contested This book brings together contributions that reflect the current diversity of approaches from the fields of biology primatology palaeoanthropology psychology social anthropology ethnobiology and archaeology to examine social and cultural transmission from a range of perspectives and at

Manners,2017-07-12 This festschrift commemorates Julian H Steward The essays were contributed by former students colleagues and other anthropologists whose research or thinking has been influenced by him There was no preconceived attempt to give the volume any greater sense of unity or to impose upon the contributors any restrictions as to subject matter On the contrary each author was urged to write on an anthropological topic of greatest current interest to himself Many of the essays could be placed just as handily within a division other than the one to which they have arbitrarily been assigned in the book This kind of interchangeability may reflect in some measure the interrelatedness of Steward s contributions to anthropological theory The broad relevance of all the selections to Steward s work could reflect also the extent to which his interests continue to be reflected in the work of anthropologists influenced by him It could also reflect a parallelism of theoretical concerns within the profession that stem from the cultural ambience that produced Steward himself Parallelisms and convergence are aspects of the kind of cultural determinism which has claimed Steward s attention during the many years that he fought a fairly lonely battle to establish the respectability of evolutionism in anthropology Now that respectability has been achieved with an almost bandwagon fervor it is clear that Steward as much as anyone else in anthropology was responsible for the change The essays in this collection are at once a vindication of his patience an evidence of the high status he enjoys among anthropologists and a testimony to the impact of his unusual creativity on his colleagues **Cultural Anthropology** Roger M. Keesing,1976 **CULTURAL ANTHROPOLOGY A CONTEMPORARY PERSPECTIVE** Third Edition is a sophisticated synthesis of social and cultural anthropology Keesing was concerned with the political and ethical implications of anthropological fieldwork and was sensitive to the global conditions of inequality caused by the spread of capitalist relations of production Thus his book is more political than other introductory texts in the field Keesing was also committed to the belief that students should not merely memorize terms and theories but should also be challenged to ponder the deep questions raised by human diversity Roger Keesing s untimely death in 1992 necessitated that a co author execute his planned revision Dr

Andrew Strathern was chosen because like Keesing his training is in the British social anthropological tradition his fieldwork has concentrated on the Pacific and his recent teaching experience has acquainted him with American cultural anthropology In this revision Dr Strathern preserved Keesing s vision arguments and the ethnographies presented as illustrations of Keesing s theories while also examining each sentence to determine whether its assertions needed to be updated modified or abandoned Small changes made in this way incorporated a larger aim of updating and recasting the book to better fit and reflect a world 20 years since publication of the first edition *An Introduction to Sociology* Carl Addington Dawson, Warner Ensign Gettys, 1929 **Education and Anthropology** Annette Rosenstiel, 2019-07-23 Originally published in 1977 and compiled over a period of 25 years of teaching and research in the fields of education and anthropology this annotated bibliography was designed as a single source reflecting 1 historical influences 2 current trends 3 theoretical concerns and 4 practical methodology at the interfaces of these disciplines All entries listed alphabetically by author are numbered for ready reference and the material covered spans nearly three centuries from the earliest entry in 1689 to the most recent in 1976 The volume also contains entries for items dealing with the teaching of anthropology and the use of anthropological concepts and data in teaching
