Schlesinger, 2021-03-22 Sexual Murder Catathymic and Compulsive Homicides is the culmination of the author s 45 years of experience with and studying sexually motivated homicide Sexual murders are generally of two types catathymic and compulsive Catathymic homicides are caused by a breakthrough of underlying sexual conflicts They can be unplanned explosive acute attacks or planned murders stemming from a chronic obsession with or disturbed attachment to the victim In compulsive homicides a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill and the killing itself is sexually gratifying These murders also may be planned or unplanned In compulsive homicides that are unplanned the urge breaks through and disrupts the offender s controls when a victim of opportunity crosses his path The compulsive offender who plans his crimes often eludes law enforcement and as a result he can have multiple serial victims over extended periods of time Both forms of sexual murder the catathymic and the compulsive are presented in this volume from a clinical descriptive perspective encompassing case studies with analysis Recent advances in empirical research in sexual murder including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico has published many important studies These include such topics as necrophilia foreign object insertions in sexual homicide ritual and signature and temporal patterns in serial sexual homicide mass murder crime scene staging in homicide and undoing symbolic reversal at homicide scenes All such research will be included and incorporate into this fully updated Second Edition including approximately fifty new clinical case studies     Bloodstain Patterns Anita Y. ### **Verb Valency Patterns**

Susen Faulhaber, 2011-04-29 Taking as its point of departure the general assumption that meaning is crucial in accounting for verb complementation this volume presents the results of an empirical study of verb complementation patterns of semantically similar English verbs The semantic parallels of the verbs selected are based on their coverage in dictionaries first and foremost the Valency Dictionary of English Herbst Heath Roe and G tz 2004 as well as corpus research and native speaker assessments It is demonstrated that despite obvious similarities in complementation between such verbs there are still a significant number of syntactic discrepancies which cannot be accounted for on the basis of meaning alone and that semantic factors such as selection restrictions and aspectual properties do not sufficiently correlate with the verbs syntactic properties and consequently do not have sufficient explanatory power Thus the results rigorously challenge so called projectionist approaches which assume the position that complementation is determined by semantic properties and thus ought to be predictable on this basis In the light of a general trend towards placing greater emphasis on semantic aspects in the fields of construction grammar and cognitive grammar too the number of idiosyncratic phenomena on the level of single complements as well as whole patterns clearly underlines the importance of storage phenomena as opposed to rule based generation As such it stresses the necessity of finding ways to systematically account for item specific properties of verbs in any grammatical theory of the English language The book is targeted at all linguists interested in the relationship between semantics and syntax which is one of the prevalent questions in modern linguistics also in the field of construction grammar and cognitive grammar Since the data is presented in a way which is compatible with various theories of complementation the target group is clearly not restricted to any specific linguistic school Because of the large amount of item specific information presented this book is also a valuable source for grammarians and lexicographers

### **Putting Intellectual**

**Property in Its Place** Laura J. Murray, S. Tina Piper, Kirsty Robertson, 2014-03 Putting Intellectual Property in its Place

examines the relationship between creativity and intellectual property law on the premise that despite concentrated critical attention devoted to IP law from academic policy and activist quarters its role as a determinant of creative activity is overstated. The effects of IP rights or law are usually more unpredictable, non-linear or illusory than is often presumed. Through a series of case studies focusing on nineteenth century journalism, fake art, plant hormone research, between the wars online knitting communities, creativity in small cities and legal practice, the authors discuss the many ways people comprehend the law through information and opinions gathered from friends, strangers, coworkers and the media. They also show how people choose to share, create, negotiate and dispute based on what seems fair, just or necessary in the context of how their community functions in that moment while ignoring or reimagining legal mechanisms. In this book, authors Murray Piper and Robertson define the everyday life of IP law, constituting an experiment in non-normative legal scholarship and in building theory from material and located practice.

*Victimology* William G. Doerner, Steven P. Lab, 2024-08-06

*Victimology* Tenth Edition covers the scope of crime victims suffering in the US, offering a history of victims and the measurement of victimization, an explanation of the victim's role in the criminal justice process and a recounting of the issues crime victims face as a result of crime and involvement in the criminal justice process. Doerner and Lab, both well-regarded scholars, write compellingly about how the current criminal justice system can be transformed into a victim's justice system. Theory is woven together with the description of each topic, and specific examples illustrate each point. The book goes on to address the full impact of victimization, and a final section details specific types of victimization ranging from violent crimes including child and elder abuse to property crime to crime in the school and in the workplace. The authors explain how obstacles hinder the pursuit of justice and provide significant policy and programming suggestions to render the system more victim-friendly. Appropriate for undergraduate as well as early graduate students in *Victimology* courses in Criminology, Criminal Justice, Sociology and Justice Studies programs, this book offers instructor's aides with test bank and PowerPoint lecture slides as well as a companion site with student resources.
