Eight Habits of Highly Effective Math Students (and the Teachers Who Teach Them) Sue Chapman, Holly Burwell, Mary Mitchell, 2025-03-20 Essential habits to build mathematical confidence and competence for all students It has been said that teachers make approximately 1 500 decisions a day Given the volume of work it is no wonder that these decisions are frequently made reflex like and in the moment By intentionally nurturing effective habits in students as well as in teachers we can make these decisions more deliberately and in so doing foster a positive relationship with mathematics that will set students on an unstoppable trajectory of math learning Eight Habits of Highly Effective Math Students and the Teachers Who Teach Them focuses on developing eight essential habits that support mathematical competence and confidence in students This resource is designed as a personalized practice based professional learning experience leading you through a wealth of professional learning and application activities to support you in growing a specific math habit in your classroom to strengthen your students math learning and build your own efficacy The book offers the chance to choose your own adventure through three teacher inquiry options focused on a specific math habit Give it a Go An Informal Exploration of a Teaching Action and Its Impact on Student Learning Classroom Inquiry A Classroom Based Teacher Inquiry Project Focus on Equity A Teacher Inquiry to Notice and Disrupt Patterns of Inequity This book provides an actionable framework for improving math teaching and learning by Emphasizing a commitment to equity because all students are capable of learning high level mathematics when provided with access to high quality instruction Helping teachers develop mindsets and habits to consciously reflect on their instructional practice to continually strengthen teaching effectiveness and student learning outcomes Curating short readings and practice based professional learning activities that can be engaged in individually or collaboratively Highlighting the importance of celebrating growth and the role of teachers in nurturing good habits in their students Offering a guide to coaching the habit through a process called Notice Nurture Name and Nudge Eight Habits of Highly Effective Math Students and the Teachers Who Teach Them is grounded in the unwavering belief that all students are math capable and all teachers can effectively teach mathematics The book can be used individually by elementary school teachers and education leaders at school and district levels or in collaborative professional learning settings It is an excellent companion to Holly Burwell and Sue Chapman s book Power Up Your Math Community Corwin 2024

Teaching and Learning Patterns in School Mathematics Ferdinand Rivera, 2014-07-08 This book synthesizes research findings on patterns in the last twenty years or so in order to argue for a theory of graded representations in pattern generalization While research results drawn from investigations conducted with different age level groups have sufficiently demonstrated varying shifts in structural awareness and competence which influence the eventual shape of an intended generalization such shifts however are not necessarily permanent due to other pertinent factors such as the complexity of patterning tasks The book proposes an alternative view of pattern generalization that is one that is not about

shifts or transition phases but graded depending on individual experiences with target patterns The theory of graded representations involving pattern generalization offers a much more robust understanding of differences in patterning competence since it is sensitive to varying levels of entry into generalization Empirical evidence will be provided to demonstrate this alternative view which is drawn from the author s longitudinal work with elementary and middle school children including several investigations conducted with preservice elementary majors Two chapters of the book will be devoted to extending pattern generalization activity to arithmetic and algebraic learning of concepts and processes The concluding chapter addresses the pedagogical significance of pattern learning in the school mathematics curriculum
