from a Multilevel Perspective examines multilevel or hierarchical linear models of research on schooling and the statistical and computational issues that arise in applying them. Some of the likely benefits of using multilevel methods to study schools and classrooms are also discussed, including the increased credibility of the statistical findings. Comprised of 15 chapters, this book begins by considering how the explicit modeling of the organizational structure of schooling creates new opportunities for research. After presenting a basic guide to the techniques of multilevel modeling, the effect of school class and individual variables on science achievement in Israeli elementary schools is analyzed using a two-level hierarchical model with emphasis on reform in the science curriculum which began in the early 1970s. Subsequent chapters focus on the use of multilevel models to link educational progress with curriculum coverage trends in attainment in Scottish secondary schools, the technical and vocational education initiative in Britain, and sex discrimination in teachers' salary. This monograph should be of considerable interest to students, teachers, school administrators, researchers, and educational policymakers. Essays in Twentieth-Century Southern Education Wayne Urban, 2014-03-05. A comprehensive treatment of the defining issues: race, class, reform regarding education in this century of the American South. The approaches range from broad-based historical comparisons to analyses of select case studies. **Improving School Effectiveness** John MacBeath, Peter Mortimore, 2001-04-16. What have we learned after three decades of research into school effectiveness? What are the messages for policy makers, for schools, for classroom teachers, for parents and their children? What can we say with confidence about how schools improve? What do we want from our schools in the future and how can we achieve it? This book sets out to answer these questions, reviewing findings from seminal international work and from a major study conducted recently in Scotland, the Improving School Effectiveness Project. It builds up a fascinating picture of what effectiveness is, how it can be measured, and what it means for teachers, parents, and pupils. It provides key quantitative data that shows just how schools can and do make a difference, but that their effects tend to be more powerful at different stages in a child's school career and with differing effects for girls and boys and for different school subjects. From in-depth work with twenty-four case study schools, we are also given much rich qualitative evidence about, for instance, the links between attitudes and attainment within a school, about the ethos of a school and its capacity for change, about the significance of a school development plan in bringing about changes, and about the role and impact of critical friends in pursuing improvement in schools. **Improving School Effectiveness** is an important book for everyone who is interested in valuing the effectiveness of and securing improvement in schools: for teachers, heads, inspectors, policy makers, and students and scholars of school effectiveness and improvement. *Exploring Education* Alan R. Sadovnik, Peter Cookson, Jr., Susan Semel, Ryan Coughlan, 2017-10-10. This much anticipated fifth edition of *Exploring Education* offers an alternative to traditional foundations texts by combining a point-of-view analysis with primary source readings. Pre- and in-service teachers will find a solid introduction to the foundations disciplines: history, philosophy, politics, and sociology of education, and their application to educational issues.
