During its nearly seven decades in print, it has become a standard reference for the fields of occupational health and toxicology. The volumes on industrial hygiene are cornerstone reference works for not only industrial hygienists but also chemists, engineers, toxicologists, lawyers, and occupational safety personnel. Volume 1 covers Introduction of Industrial Hygiene and Recognition of Chemical Agents. In addition to revised and updated chapters, a number of new chapters reflect current technology and concerns. The chapters include Ethics in Industrial Hygiene, Prevention through Design, Risk Communication, Managing Workplace Demographics, and Mastering Digital Media for Workers, Employers, and Community Practice.

**Patty's Toxicology, 6 Volume Set** Eula Bingham, Barbara Cohrssen, 2012-07-31 Featuring the improved format used in the 5th edition, this updated set presents in logical groupings comprehensive toxicological data for industrial compounds, including CAS numbers, physical and chemical properties, exposure limits, and biological tolerance values for occupational exposures, making it essential for toxicologists and industrial hygienists. This edition has about 40% new authors who have brought a new and international perspective to interpreting industrial toxicology and discusses new subjects such as nanotechnology, flavorings, and the food industry, reactive chemical control, comprehensive chemical policy, metalworking fluids, and pharmaceuticals.

**Patty's Industrial Hygiene and Toxicology, 3 Volume Set, 10 Parts** George D. Clayton, Florence E. Clayton, 1995-08-04 In the tradition that has made these volumes an industry classic, this edition offers in depth comprehensive and timely coverage of cutting edge issues and innovations in the field. This latest revision features 18 new subjects, including visual display terminal safety, biological agents in the workplace, indoor air pollution, and design of analytical laboratories. These new additions build on the existing broad coverage of industrial hygiene as both a science and an art devoted to the recognition, evaluation, and control of environmental factors and stresses affecting the health of all workers.
