including the mechanism for paying taxes and other creditors establishing who is entitled to inherit the deceased's property and how that property is to be transferred to those entitled to it. Where this involves the law of more than one Member State complications arise which can have a significant impact since the people affected are likely to be emotionally vulnerable because of bereavement. The Committee states it welcomes the fact that the Commission has not proposed harmonisation of the substantive law of succession and support the Commission's underlying and more limited objective of prescribing which state's law of succession is to apply to the whole of a deceased person's estate but only to the extent of determining who is entitled to inherit what property. The Committee believes to go further puts at risk important interests not least property rights, the collection of taxes and the protection of creditors. The Committee also identifies a serious defect in the EU's proposal that it could result in gifts made in the UK by deceased persons during their lifetime including gifts to charity being claimed back by their heirs under a process known as clawback.

**Trusts and Equity** Gary Watt, 2016. The seventh edition of *Trusts Equity* builds on the successful approach taken in previous editions and continues to offer students a thorough and enthusiastic analysis of this complex field of law. Drawing on years of experience as a teacher, writer and researcher, Gary Watt brings a lively, engaging approach to the subject in this detailed text. Framing the study of trusts and equity within a unique conceptual framework of the four key perspectives: precedent, principle, policy and pragmatism, Watt explains the reasons behind key decisions with clarity and rigour. The subject is brought to life through engaging cultural and historical references, placing the law within contexts that readers will relate to. This book encourages you to engage actively with the subject and to think critically about its central issues. For further details on new cases and legislation included in this edition, please see page xi. Book jacket.

**Drawing Theories Apart** David Kaiser, 2009-11-15. Winner of the 2007 Pfizer Prize from the History of Science Society. Feynman diagrams have revolutionized nearly every aspect of theoretical physics since the middle of the twentieth century. Introduced by the American physicist Richard Feynman in 1918-88, soon after World War II, as a means of simplifying lengthy calculations in quantum electrodynamics, they soon gained adherents in many branches of the discipline. Yet as new physicists adopted the tiny line drawings, they also adapted the diagrams and introduced their own interpretations. *Drawing Theories Apart* traces how generations of young theorists learned to frame their research in terms of the diagrams and how both the diagrams and their users were molded in the process. Drawing on rich archival materials, interviews and more than five hundred scientific articles from the period, *Drawing Theories Apart* uses the Feynman diagrams as a means to explore the development of American postwar physics. By focusing on the ways young physicists learned new calculational skills, David Kaiser frames his story around the crafting and stabilizing of the basic tools in the physicist's kit, thus offering the first book to follow the diagrams once they left Feynman's hands and entered the physics vernacular.

**Practice-led Research, Research-led Practice in the Creative Arts** Hazel Smith, 2009-06-30. This book addresses one of the most exciting and innovative developments within higher education: the rise in prominence of the

creative arts and the accelerating recognition that creative practice is a form of research The book considers how creative practice can lead to research insights through what is often known as practice led research But unlike other books on practice led research it balances this with discussion of how research can impact positively on creative practice through research led practice The editors posit an iterative and web like relationship between practice and research Essays within the book cover a wide range of disciplines including creative writing dance music theatre film and new media and the contributors are from the UK US Canada and Australia The subject is approached from numerous angles the authors discuss methodologies of practice led research and research led practice their own creative work as a form of research research training for creative practitioners and the politics and histories of practice led research and research led practice within the university The book will be invaluable for creative practitioners researchers students in the creative arts and university leaders Key Features The first book to document conceptualise and analyse practice led research in the creative arts and to balance it with research led practice Written by highly qualified academics and practitioners across the creative arts and sciences Brings together empirical cultural and creative approaches Presents illuminating case histories of creative work and practice led research

the way Cases, Materials and Text on Property Law Sjef van Erp, Bram Akkermans, 2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe ie the law of immovables movables and claims offering signposts and stepping stones for the reader wishing to explore this fascinating area The subject matter is explained with careful attention given to its history foundations thought patterns underlying principles and basic concepts The casebook focuses on uncovering differences and similarities between Europe s major legal systems French German Dutch and English law are examined while Austrian and Belgian law are also touched upon The book combines excerpts from primary source materials case law and legislation and from doctrine and soft law In doing so it presents a faithful picture of the systems concerned Separate chapters deal with the various types of property rights their creation transfer and destruction with security rights such as mortgages pledges retention of title as well as with harmonising and unifying efforts at the EU and global level Through the functional approach taken by the Ius Commune Casebooks this volume clearly demonstrates that traditional comparative insights no longer hold The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial form of harmonisation or approximation very unlikely Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground so it was thought could be found However economic integration in particular integration of financial markets and freedom of establishment has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments eg retention of title This pressure towards integration has led comparative lawyers to refocus their interest from contract tort and unjustified enrichment to property law and delve beneath its surface This book reveals that today property law systems are closer to one another than previously assumed that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe
