Pets, People, and Pragmatism Erin McKenna, 2013-03-18 Pets People and Pragmatism examines human relationships with pets without assuming that such relations are either benign or unnatural and to be avoided The book addresses a lack of respect in pet people relationships for respectful relationships to be a real possibility however humans must make the effort to understand the beings with which we live work and play American pragmatism understands that humans and other animal beings have been interacting and transforming each other for thousands of years There is nothing unnatural about the human domestication of other animal beings though domestication does raise specific practical and ethical questions A pragmatist account of our relationship with those animal beings commonly considered as pets does not prohibit the use of these beings in research entertainment competition or work It does however find abuse and neglect ethical Because abuse can occur in any use of other animal beings this pragmatist account takes up the abusive practices in research entertainment competition and work without arguing that these practices are inherently abusive Some of the sources of abuse have been addressed by utilitarian and deontological accounts but a pragmatist evolutionary perspective offers unique insights and results in some surprising conclusions For instance there may be an ethical obligation to let a horse race a dog show or a cat compete in agility Pets People and Pragmatism embarks on a philosophical journey that will captivate scholars and pet enthusiasts alike It provides an important contribution to longstanding debates in the area of animal issues and strengthens the idea of multiple approaches to nonhuman beings It also opens space for approaches that challenge some of the assumptions in the field of philosophy that have resulted in a dualistic and hierarchical approach to metaphysics and ethics

Webb,1998-01-15 Many of us keep pet animals we rely on them for companionship and unconditional love For some people their closest relationships may be with their pets In the wake of the animal rights movement some ethicists have started to re examine this relationship and to question the rights of humans to own other sentient beings in this way In this engaging and thought provoking book Stephen Webb brings a Christian perspective to bear on the subject of our responsibility to animals looked at through the lens of our relations with pets especially dogs Webb argues that the emotional bond with companion animals should play a central role in the way we think about animals in general and against the more extreme animal liberationists defends the intermingling of the human and animal worlds He tries to imagine what it would be like to treat animals as a gift from God and indeed argues that not only are animals a gift for us but they give to us we need to attend to their giving and return their gifts appropriately Throughout the book he insists that what Christians call grace is present in our relations with animals just as it is with other humans Grace is the inclusive and expansive power of God s love to create and sustain relationships of real mutuality and reciprocity and Webb unfolds the implications of the recognition that animals too participate in God s abundant grace Webb s thesis affirms and persuasively defends many of the things that pet lovers feel instinctively that their relationships with their companion animals are meaningful and important and that their pets have value and worth in themselves in the eyes of God His book will appeal to a broad audience of thoughtful Christians and animal lovers **Human-Animal Relations in Tourism, Leisure and Development** Carlos Monterrubio,Xavier López-Medellín,Katherine Dashper,Helen Wadham,2025-04-17 Humans and animals have developed multiple and complex interactions in the fields of tourism leisure and development However much of the existing research on how humans and animals interact in these fields has emerged from within the context of developed countries As a result little has been documented about human animal interactions in the

socioeconomic cultural and environmental contexts of countries in the Global South Specifically the diversity and complexity of interspecies relationships in tourism leisure and local development in Latin America have been largely ignored in Anglo Saxon literature This has resulted in a limited partial and hegemonic understanding and debate about human animal relationships globally dominated by certain regions of the world This book addresses this gap by documenting multiple and complex relationships between humans and animals in the fields of tourism leisure and local development in countries in Latin America
