Jukebooks Claus-Ulrich Viol, 2006 **Healing the Split** John E. Nelson, 1994-01-01 The links between madness creative genius and spiritual experiences have tantalized philosophers and scientists for centuries In *Healing the Split* John Nelson brings the lofty ideas of transpersonal psychology down to earth so they can be applied in a practical way to explain the bizarre effects of insanity on the human mind Drawing on a vast knowledge of Eastern philosophy and mainstream neuropsychiatry he heals the split between orthodox and alternative views with a comprehensive approach that goes beyond both Starting where R D Laing and Thomas Szasz left off Nelson revises and expands their radical views in light of modern brain science He then turns to ancient tantric yoga for a synthesis that weaves brain psyche and spirit into a compelling new conception of mental illness For professionals who seek to meet the needs of their patients more creatively this book offers a unique synthesis For people in emotional crisis it clarifies the distinctions among intractable psychosis temporary breakdowns in the service of healing spiritual emergencies and psychic breakthroughs spiritual emergence And for anyone interested in the seemingly inexplicable workings of the human mind gone mad this fascinating exploration of psychotic states of consciousness will be exciting reading **Behavioral Neuroscience of Attention Deficit Hyperactivity Disorder and Its Treatment** Clare Stanford, Rosemary Tannock, 2012-01-10 In this volume there is a strong emphasis on translational science with preclinical approaches suggesting new directions for development of new treatments Individual chapters describe how neuroimaging neuroendocrine genetic and behavioral studies use powerful research tools that are offering a completely new understanding of the factors that increase vulnerability to ADHD The clinical impact of co morbid problems especially obesity and substance misuse are highlighted and explain what such problems can tell us about the etiology of ADHD more generally Reviews of the pharmacology of established drug treatments for ADHD justify an exciting novel theory for their therapeutic actions and address questions about the effects of their long term use [Current Index to Journals in Education](#) , 2000-04 **Making Mind** Gregory F. Tague, 2014-01-01 Making Mind Moral Sense and

Consciousness in Philosophy Science and Literature posits the genesis of narrative as an adaptive function stemming from consciousness and moral sense The book is unique with its idea of the individual character evolving narrative in relation to the group Central to the argument is the claim that prehistorically consciousness and moral sense intersected to form narrative More than addressing the origin of story the book examines and explains the evolution of narrative The book is an interesting study of how our species inherited moral sense can differ dramatically from one individual to another While mores pertain to a group narrative comes from and is processed by the individual and reaches its high point in the novel We see how the moral sense works in characters as a monitor and we feel it operating in us as readers in terms of approval or not
