Police Of Paris:

Policing Paris Clifford D. Rosenberg, 2018-07-05 The surveillance of immigrants and potential terrorists preoccupies leaders throughout the industrialized world Yet these concerns are hardly new Policing Paris examines a critical moment in the history of immigration control and political surveillance Drawing on massive police archives and other materials Clifford Rosenberg shows how in the years after the Great War the French police terrified by the Bolshevik Revolution and the specter of immigrant criminality became the first major force anywhere systematically to enforce distinctions of citizenship and national origins As the French capital emerged as a haven for refugees dissidents and workers from throughout Europe and across the Mediterranean in the 1920s police officers raided immigrant neighborhoods to scare illegal aliens into registering with authorities and arrested those whose papers were not in order The police began to concentrate on colonial workers from North Africa tracking these workers with a special police brigade and segregating them in their own hospital when they fell ill Transformed by their enforcement legal categories that had existed for hundreds of years began to matter as never before They determined whether or not families could remain together and whether people could keep their jobs or were forced to flee During World War II identity controls marked out entire populations for physical destruction The treatment of foreigners during the Third Republic Rosenberg contends shaped the subsequent treatment of Jews by Vichy At the same time however he argues that the new methods of identification pioneered between the wars are more directly relevant to the present day They created forms of inclusion and inequality that remain pervasive as industrial welfare states around the world find themselves compelled to provide benefits to their own citizens and recruit foreign nationals to satisfy their labor needs

Police Detectives in History, 1750-1950 Clive Emsley, 2017-09-29 While the history of the uniformed police has prompted considerable research the historical study of police detectives has been largely neglected confined for the most part to a chapter or a brief mention in books dealing with the development of the police in general The collection redresses this imbalance Investigating themes central to the history of detection such as the inchoate distinction between criminals and detectives the professionalisation of detective work and

the establishment of colonial police forces the book provides a the first detailed examination of detectives as an occupational group with a distinct occupational culture Essays discuss the complex relationship between official and private law enforcers and examine the ways in which the FBI in the U S A and the Gestapo in Nazi Germany operated as instruments of state power The dynamic interaction between the fictional and the real life image of the detective is also explored Expanding on themes and approaches introduced in recent academic research of police history the comparative studies included in this collection provide new insights into the development of both plain clothes policing and law enforcement in general illuminating the historical importance of bureaucratic and administrative changes that occurred within the state system

Dogopolis Chris Pearson, 2024-05-31 Dogopolis presents a surprising source for urban innovation in the history of three major cities human canine relationships Stroll through any American or European city today and you probably won't get far before seeing a dog being taken for a walk It's expected that these domesticated animals can easily navigate sidewalks streets and other foundational elements of our built environment But what if our cities were actually shaped in response to dogs more than we ever realized Chris Pearson's Dogopolis boldly and convincingly asserts that human canine relations were a crucial factor in the formation of modern urban living Focusing on New York London and Paris from the early nineteenth century into the 1930s Pearson shows that human reactions to dogs significantly remolded them and other contemporary western cities It's an unalterable fact that dogs often filthy bellicose and sometimes off putting run away spread rabies defecate and breed wherever they like so as dogs became a more and more common in nineteenth century middle class life cities had to respond to people's fear of them and revulsion at their least desirable traits The gradual integration of dogs into city life centered on disgust at dirt fear of crime and vagrancy and the promotion of humanitarian sentiments On the other hand dogs are some people's most beloved animal companions and human compassion and affection for pets and strays were equally powerful forces in shaping urban modernity Dogopolis details the complex interrelations among emotions sentiment and the ways we manifest our feelings toward what we love showing that together they can actually reshape society
