Policy And Politics In France Living With Uncertainty:

Domestic Politics and Norm Diffusion in International Relations Thomas Risse, 2016-10-14 This book collects Thomas Risse's most important articles together in a single volume. Covering a wide range of issues: the end of the Cold War, transatlantic relations, the democratic peace, human rights, governance in areas of limited statehood, Europeanization, European identity and public spheres, most recently comparative regionalism, it is testament to the breadth and excellence of this highly respected International Relations scholar's work. The collection is organized thematically: domestic politics and international relations, international sources of domestic change and the diffusion of ideas and institutions, and a brand new introductory essay provides additional coherence. This text will be of key interest to scholars and students of International Relations, European Politics, and Comparative Politics. Policy and Politics in France Douglas Elliott Ashford, 1982 Under the new socialist regime of Francois Mitterand how much will French policymaking change? How has it functioned under previous regimes? How does the French process compare with policymaking in other industrial states? These are some of the questions Douglas E. Ashford considers in analyzing six major areas of domestic policymaking in France: administrative reform, local and regional reform, economic policy, industrial relations, social security, and immigration. Each case is accompanied by selected readings translated from official government documents and the writings of critics of official policy, including readings from the Mitterand period. The book offers an unusually strong point of view, one that differs from the standard interpretations of French Politics. *Policy and Politics in France* is the third volume in the series *Policy and Politics in Industrial States* edited by Douglas E. Ashford. Peter J. Katzenstein and T. J. Pempel. Each volume consists of a balance of provocative analysis and documents for six issues. Four topics: economic policy, labor relations, social welfare, and the internal organization of the state are common to all volumes; the remaining two are reserved for policy problems peculiar to the individual country. Author note: Douglas E. Ashford is Andrew W. Mellon Professor of Comparative Politics at the University of Pittsburgh. He was formerly Director of the Western Societies Program at Cornell University. He is author of *Policy and Politics in Britain: The Limits of Consensus*, also in this series.

France in Crisis Timothy B. Smith, 2004-11-11 Timothy Smith argues that the French economy and society is in crisis and that globalization is not to blame.

France Encounters Globalization Peter Karl Kresl, Sylvain Gallais, 2002-01-01 There is much of interest here and the authors provide background information and digressions that make their analysis more accessible to noneconomists. M. Veseth Choice. This book is the first in English to comprehensively examine the French economy and how it is adjusting to the exigencies of an increasingly globalized environment. The opening of the French market to international competition has forced recent governments to realize that the old closed model in which France had considerable autonomy over policy is no longer valid. French solutions to domestic problems had to be given up in the early

1980s Changes in technology have had dramatic impacts on the comparative advantage of French producers and the necessary restructuring has been far from easy These twin aspects of globalization have also altered the situation of France's various regions and urban economies and the highly centralized structure has come under pressure This has forced a change in the thinking of French public and private sector leaders The role of the state the degree of intervention the extent of control over the domestic economy and the need to be accommodating to market forces have all been subject to public debate and to fundamental reconsideration While this is a book on the French economy Kresl and Gallais deal with issues challenges and processes of change and adaptation that are facing all of Europe and indeed all industrialized economies

Elgie, 1993-10-06 The institution of the Prime Minister in France remains remarkably understudied There are many personalised accounts of the work of individual Prime Ministers and their relations with Presidents and government ministers However there has been no rigorous attempt to analyse the Prime Minister's overall influence in the decision making process The aim of this book is to examine the contemporary role of the Prime Minister in the French political system By so doing it provides a systematic analysis of the Prime Minister's influence over the policy making process from 1981 to 1991

The Politics of Immigration in France, Britain, and the United States M. Schain, 2012-06-18 Updated through 2012 with all new material in every chapter Schain's book provides a detailed comparative look at the policies that drive and inform immigration politics in three Western countries and shows how immigration policy has political sources far beyond labor market needs *France After Hegemony* Michael Maurice Loriaux, 1991 How does the decline of the hegemon the dominant rule making power of the international system affect middle

level nations By examining monetary and credit policy in postwar France Michael Loriaux illuminates this question tracing the relationship of domestic economic reform to specific changes in the international political economy which have resulted from U S hegemonic decline
