Policy On Design Of Urban Highways And Arterial Streets

**United States. Federal Highway
Administration**

Policy On Design Of Urban Highways And Arterial Streets:

A Policy on Design of Urban Highways and Arterial Streets, 1973 This Policy was developed as a part of the continuing work of the Standing Committee on Engineering Policies *A Policy on Design of Urban Highways and Arterial Streets* American Association of State Highway and Transportation Officials, 1973 *A Policy on Design of Urban Highways and Arterial Streets*, 1973 **A Guide for Achieving Flexibility in Highway Design**, 2004 Context sensitive solutions CSS reflect the need to consider highway projects as more than just transportation facilities Depending on how highway projects are integrated into the community they can have far reaching impacts beyond their traffic or transportation function CSS is a comprehensive process that brings stakeholders together in a positive proactive environment to develop projects that not only meet transportation needs but also improve or enhance the community Achieving a flexible context sensitive design solution requires designers to fully understand the reasons behind the processes design values and design procedures that are used This AASHTO Guide shows highway designers how to think flexibly how to recognize the many choices and options they have and how to arrive at the best solution for the particular situation or context It also strives to emphasize that flexible design does not necessarily entail a fundamentally new design process but that it can be integrated into the existing transportation culture This publication represents a major step toward institutionalizing CSS into state transportation departments and other agencies charged with transportation project development **Design of Urban Streets** James H. Kell, Iris J. Fullerton, JHK & Associates, 1980 *A Policy on Geometric Design of Highways and Streets*, 2011 American Association of State Highway and Transportation Officials, 2011 **Design of Urban Streets** William R. Reilly, 1980 I-26 Connector, I-40 to US-19-23-70 North of Asheville, Buncombe County, 2008 *Manual on Uniform Traffic Control Devices for Streets and Highways* United States. Federal Highway Administration, 1978 **Urban Transportation Planning in the United States** Edward Weiner, 1999-02-28 The development of U S urban transportation policy over the past 50 years illustrates the changing relationship between federal state and local governments This comprehensive text examines the evolution of urban transportation planning from early developments in highway planning in the 1930s to the concern for sustainable development and pollution emissions Focusing on major national events the book discusses the influence of legislation regulations conferences federal programs and advances in planning procedures and technology The book offers an in depth look at the most significant event in transportation planning the Federal Aid Highway Act of 1962 Creating a federal mandate for a comprehensive urban transportation planning process carried out cooperatively by states and local governments with federal funding this act was crucial in the spread of urban transportation Claiming that urban transportation planning is more sophisticated costly and complex than its highway and transit planning predecessors the book demonstrates how urban transportation planning evolved in response to changes in such factors as environment energy development patterns intergovernmental coordination and federal transit programs It further illustrates how broader

concerns for global climate change and sustainable development have braided the purview of transportation planning
