Polikarpov I15bis:

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 From the heat of Spain to the frozen wastelands of Finland this book reveals the combat stories of the pilots who flew the Polikarpov fighters from 1936 until the end of World War II The I 15 I 16 and I 153 fighters were the world s first mass produced fighters Some 17 000 Polikarpovs had been manufactured by the time production ceased in 1941 They served with the Republicans in the Spain the Chinese against Japan in 1937 38 and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War By 1941 more than 20 Soviet pilots had made ace in Polikarpovs and many more attained that status during the first months of the German invasion Though thoroughly outclassed this book shows how the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east and continued to serve as training aircraft and as frontline fighters some right through to 1945

Aces of the Republic of China Air Force Raymond Cheung, 2015-05-20 The ace pilots of the Republic of China Air Force have long been shrouded in mystery and obscurity as their retreat to Taiwan in 1949 and blanket martial law made records of the RoCAF all but impossible to access Now for the first time the colourful story of these aces can finally be told Using the latest research based on released archival information and full colour illustrations this book charts the history of the top scoring pilots of the RoCAF from the beginning of the gruelling eight year Sino Japanese War to the conclusion of the Civil War against the Chinese Communists Beginning as a ragged and very disparate group of planes and pilots drawn from various provincial air forces the RoCAF gradually became standardised and was brought under American tutelage Altogether it produced 17 aces who scored kills whilst flying a startling variety of aircraft from biplanes to F 86 Sabres

Monino Museum Moscow Ken Duffey, 2013-06-19 One of the premier collections of Soviet and Russian aircraft the Monino museum opened in 1960 and covers an area of about 20 hectares It has on display more than 173 aircraft and 127 aero engines with 44 of its exhibits having been declared as monuments of science and technology The Monino museum charts the history of Soviet and Russian aviation from the earliest pre revolutionary days until the present time with exhibits in the form of models artefacts posters aero engines weapons etc as well as airframes ejection seats rockets covering the later period This book describes and illustrates all the exhibits on display in this amazing museum It serves as a guide for those visiting Monino and a mouth watering taste for those unable to get there in person

Spanish Republican Aces Rafael A López Permy, 2013-03-20 The first book published in English to focus exclusively on the exploits of the fighter aces of the Aviación Militar in their fight against the elite pilots of the better armed Nationalist force At the start of the Spanish Civil War most young fighter pilot officers joined the rebels while the high ranking officers grupo or escuadrilla commanders and the NCOs sergeants and corporals remained loyal to the government Mostly flying the obsolete Nieuport Ni 52s these loyalists were soon outpaced by the more modern Fiat CR 32s and Heinkel He 51s However at this early stage of the war there were several Republican airmen who became aces and famous in the process despite the small numbers of enemy

aircraft shot down Widely speaking the Republican military aviation did not keep an exhaustive record of individual shooting claims However sufficient documentation exists to make a reasonable assumption as to which pilots fall into the ace category This volume details the exploits of those pilots ideal for fans of previous works in the Osprey Aircraft of the Aces series on Nationalist CR 32 Aces and Polikarpov I 15 I 16 and I 152 Aces *Allied Fighters of World War II* Bill Gunston,1992

Military Aircraft, 1919-1945 Justin D. Murphy,Matthew A. McNiece,2008-12-08 An in depth history of the time when airpower became the great equalizer changing military strategy forever and bringing once safe targets in reach Military Aircraft 1919 1945 An Illustrated History of Their Impact covers a crucial era in modern warfare technology Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II it provides an expert summing up of the decades when the use of aircraft in battle came of age In chapters covering both the history of air power and specific types of aircraft fighters bombers reconnaissance and auxiliary planes Military Aircraft 1919 1945 introduces key theorists and designers describes important changes in technology and production and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea They will also see how the expansion of war to the skies brought economic opportunity to some home fronts and looming terror and devastation to others **Soviet Fighters of the Second World War** Jason Nicholas Moore,2021-07-30 The Red Air Force had just started to re equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume **Combat Biplanes of World War II** Peter C. Smith,2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in Combat Biplanes of World War II The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft

Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini's Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World War II describes many of these gallant old warriors representing the author's own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well
