Political Consequences Of Modernization:

Modernization and Its Political Consequences Hans Blokland, 2008-10-01
People's capacity to give meaning and direction to social life is an essential dimension of political freedom. Yet many citizens of Western democracies believe that this freedom has become quite restricted. They feel they are at the mercy of anonymous structures and processes over which they have little control. Structures and processes that present them with options and realities they might not have chosen if they had any real choice. As a result, political interest declines and political cynicism flourishes. The underlying cause of the powerlessness pervading the current political system could be modernization. Taking the work of Max Weber, Karl Mannheim and Joseph Schumpeter as a point of departure, Hans Blokland here examines this process. The topics covered are among others the meaning of modernization, the forces that drive it, and especially the consequences of modernization for the political freedom of citizens to influence the course of their society via democratic politics.

Pluralism, Democracy and Political Knowledge Hans Blokland, 2016-04-22
The political discontent or malaise that typifies most modern democracies is mainly caused by the widely shared feeling that the political freedom of citizens to influence the development of their society and related to this their personal life has become rather limited. We can only address this discontent when we rehabilitate politics, the deliberate joint effort to give direction to society and to make the best of ourselves. In *Pluralism, Democracy and Political Knowledge*, Hans Blokland examines this challenge via a critical appraisal of the pluralist conception of politics and democracy. This conception was formulated by above all Robert A. Dahl, one of the most important political scholars and democratic theorists of the last half century. Taking his work as the point of reference, this book not only provides an illuminating history of political science told via Dahl and his critics; it also offers a revealing analysis as to what progress we have made in our thinking on pluralism and democracy and what progress we could make given the epistemological constraints of the social sciences. Above and beyond this, the development and the problems of pluralism and democracy are explored in the context of the process of modernization. The author specifically discusses the extent to which individualization, differentiation, and rationalization contribute to the current political malaise in those countries which adhere to a pluralist political system.
