Reunifying Europe Jordan Gheorghe Bărbulescu, 2025-01-24 The proposed volume delves into the European Union's expansion into Central and Eastern Europe after the fall of the Berlin Wall It emphasizes the candidate states perspective and seeks to draw parallels between the 1990s expansion and potential future enlargements The historical context is vital particularly the democratization and consolidation effects that past expansions had on both the candidate states and the EU as a whole The work also discusses the recently established European Political Community and its role in creating a unified European political space It contends that past expansions were win win scenarios benefiting both the EU and the candidate states and suggests that similar mutual gains can be achieved in the EU's potential enlargement into the Western Balkans and Eastern Europe The author proposes that analyzing past expansion processes offers valuable insights and concrete strategies for future extensions This may include concepts like pre accession and the European Political Community The current geopolitical climate with a more assertive Russia underscores the importance of further EU expansion to enhance Europe's stability and security Overall the book offers a comprehensive exploration of past and potential EU enlargements highlighting the enduring significance of this ongoing process in shaping the European landscape **A Political**

Chronology of Europe , 2001 **A Political History of Europe, Since 1814**, Charles Seignobos, 1901 **European Political History 1870-1913** Thomas Mergel, 2017-05-15 The period from 1870 to 1913 saw the emergence of modern mass politics The extension of the franchise the development of party structures and political cleavages and growing state intervention mark this period as one of substantial political change This collection brings together a selection of the most important recent research in this field The Political History of European Integration Hagen Schulz-Forberg, Bo

Stråth, 2014-06-03 The Maastricht Treaty in 1992 was based on neoliberal ideas of a market driven European economy and democracy and continues to be seen as a step towards a new stage of unification towards a more federal Europe based on market integration The authors demonstrate that European integration as a federal project actually came to an end around 1970 The European Economic Community EEC the precursor of EU was never thought of as a democracy The authors locate a shift in thinking about legitimacy and further integration in the 1980s when the idea of a European democracy was

connected with a plan for the internal market the market would pave the way for democracy Since then there has been a growing tension between the official line about a democratic EU and the institutional capacity to carry it through This tension undermined integration The book suggests that instead of democracy through market there are signs of increasing social disintegration political extremism and populism in the wake of economic integration Providing a more realistic historical understanding of European integration this book will be of interest to students and scholars of political science history and European studies *A Political History of Western Europe Since 1945* Derek W. Urwin, 2014-07-22 Taking a thematic approach Derek Urwin addresses the major political and economic developments in western Europe since World War II right up to the present day The book covers issues and developments in national politics and the movement towards greater unity in Western Europe and the role of Europe in global politics and in the international economy The text has been revised throughout and updated to take account of the political consequences of the ending of the Cold War and the troubled progress of European integration since Maastricht The Fifth Edition has lost nothing of its predecessor's clarity and accessibility and in its updated form will win the book a host of new admirers **Towards a Segmented European Political Order** Jozef Bátora, John Erik Fossum, 2019-11-08 This book makes a distinctive contribution to the crucial debate on the European Union EU's present and future development It systematically examines how the range of crises and challenges over the last decade have transformed the EU and relates those findings to the discussion of an increasingly differentiated EU It argues that the post crises EU shows clear signs of becoming a segmented political order with in built biases and constraints The book spells out the key features of such an order in ideational and structural terms and shows how it more concretely manifests itself in the EU's institutional and constitutional make up and in how member states constrain and condition EU action Different states impose different types of constraints as is underlined through paying explicit attention to the Visegrád countries This book will be of key interest to scholars and students of EU politics studies European integration and politics East European politics and foreign policy
