Political Ecology Of Tropical Forests In Southeast Asia:

The Political Ecology of Tropical Forests in Southeast Asia Tuck-Po Lye, Ken-ichi Abe, Wil de Jong, 2003 Following an interdisciplinary approach to debates about the future of tropical forests in Southeast Asia the authors experts in their field unravel the extent to which the interests of local inhabitants nation states and international environmental movements are intertwined This volume a joint publication with Kyoto University Press examines the highly politicized context in which local forestry problems intersect with global market forces focusing on the social and economic diversity of different tropical forests and their specific historical background It emphasizes the importance of examining local issues in their own right

Extreme Conflict and Tropical Forests Wil De Jong, Deanna Donovan, Ken-ichi Abe, 2007-04-08 There are many compelling reasons for policymakers to pay more attention to forested regions and invest more resources there Forests provide valuable products and environmental services and several hundred million extremely poor people live near them Perhaps the most compelling reason of all however is that unless policymakers take forest governance seriously and respond better to the needs of the people living there these regions will continue to be breeding grounds for violent conflict banditry and illicit crops From Nicaragua's Atlantic Coast to the jungles of Cambodia there are several dozen countries around the world that have experienced severe breakdowns in law and order in their forested regions In many of these cases those breakdowns had widespread economic social and political consequences that have threatened entire societies You would think that after all of the suffering over the last few decades in the forested regions of Colombia Peru Mexico Guatemala the two Congo's Liberia Mozambique Philippines Solomon Islands Nepal Angola Rwanda Nicaragua Cote d'Ivoire Myanmar Bangladesh India Sri Lanka Indonesia Sierra Leone Senegal Sudan Uganda and Vietnam people would begin to take note After all they don't call it jungle warfare for nothing

Global Political Ecology Richard Peet, Paul Robbins, Michael Watts, 2010-12-17 The world is caught in the mesh of a series of environmental crises So far attempts at resolving the deep basis of these have been superficial and disorganized Global Political Ecology links the political economy of global capitalism with the political ecology of a series of environmental disasters and failed attempts at environmental policies This critical volume draws together contributions from twenty five leading intellectuals in the field It begins with an introductory chapter that introduces the readers to political ecology and summarizes the book's main findings The following seven sections cover topics on the political ecology of war and the disaster state fuelling capitalism energy scarcity and abundance global governance of health bodies and genomics the contradictions of global food capital's marginal product effluents waste and garbage water as a commodity a human right and power the functions and dysfunctions of the global green economy political ecology of the global climate and carbon emissions This book contains accounts of the main currents of thought in each area that bring the topics completely up to date The individual chapters contain a theoretical introduction linking in with the main themes of political ecology as well as empirical information and case material Global Political Ecology serves as a valuable

reference for students interested in political ecology environmental justice and geography Tropical Peatland Ecosystems Mitsuru Osaki,Nobuyuki Tsuji,2015-12-07 This book is an excellent resource for scientists political decision makers and students interested in the impact of peatlands on climate change and ecosystem function containing a plethora of recent research results such as monitoring sensing modeling for carbon water flux storage biodiversity and peatland management in tropical regions It is estimated that more than 23 million hectares 62 % of the total global tropical peatland area are located in Southeast Asia in lowland or coastal areas of East Sumatra Kalimantan West Papua Papua New Guinea Brunei Peninsular Malaysia Sabah Sarawak and Southeast Thailand Tropical peatland has a vital carbon water storage function and is host to a huge diversity of plant and animal species Peatland ecosystems are extremely vulnerable to climate change and the impacts of human activities such as logging drainage and conversion to agricultural land In Southeast Asia severe episodic droughts associated with the El Ni o Southern Oscillation in combination with over drainage forest degradation and land use changes have caused widespread peatland fires and microbial peat oxidation Indonesia s 20 Mha peatland area is estimated to include about 45 55 GtC of carbon stocks As a result of land use and development Indonesia is the third largest emitter of greenhouse gases 2 3 Gtons carbon dioxide equivalent per year 80 % of which is due to deforestation and peatland loss Thus tropical peatlands are key ecosystems in terms of the carbon water cycle and climate change The Social Ecology of Tropical Forests Wil de Jong,Tuck-Po Lye,Ken-ichi Abe,2006 The Social Ecology of Tropical Forests brings together various analyses from the three major tropical regions Southeast Asia the Amazon basin and Sub Saharan Africa and by challenging simplistic correlations the authors explore the complex relationships between deforestation and migration The book provides both an historical overview of migration into these regions and presents contemporary case studies to reveal the complex interplay of factors motivating migration The scope of the discussion is extensive covering historical issues such as the impact of the slave trade on Sub Saharan African forests and communities and contemporary dilemmas like the over exploitation of natural forest products in Vietnam The authors look at the broader picture of intertwining political social geographical environmental and historical influences without seeking quick fix solutions to the social and environmental issues arising from increasing forest cover loss The analyses are spatially and temporally contextualized drawing on both qualitative and quantitative data to provide a useful resource for studying the societies of tropical regions and their social ecology **Routledge Handbook of Southeast Asian Development** Andrew McGregor,Lisa Law,Fiona Miller,2017-11-06 Southeast Asia is one of the most diverse regions in the world hosting a wide range of languages ethnicities religions economies ecosystems and political systems Amidst this diversity however has been a common desire to develop This provides a uniting theme across landscapes of difference This Handbook traces the uneven experiences that have accompanied development in Southeast Asia The region is often considered to be a development success story however it is increasingly recognized that growth underpinning this development has been accompanied by patterns of inequality violence

environmental degradation and cultural loss In 30 chapters written by established and emerging experts of the region the Handbook examines development encounters through four thematic sections Approaching Southeast Asian development Institutions and economies of development People and development and Environment and development The authors draw from national or sub national case studies to consider regional scale processes of development tracing the uneven distribution of costs risks and benefits Core themes include the ongoing neoliberalization of development issues of social and environmental justice and questions of agency and empowerment This important reference work provides rich insights into the diverse impacts of current patterns of development and in doing so raises questions and challenges for realizing more equitable alternatives It will be of value to students and scholars of Asian Studies Development Studies Human Geography Political Ecology and Asian Politics

A Companion to Global Environmental History J. R. McNeill, Erin Stewart Mauldin, 2015-05-04 The Companion to Global Environmental History offers multiple points of entry into the history and historiography of this dynamic and fast growing field to provide an essential road map to past developments current controversies and future developments for specialists and newcomers alike Combines temporal geographic thematic and contextual approaches from prehistory to the present day Explores environmental thought and action around the world to give readers a cultural intellectual and political context for engagement with the environment in modern times Brings together environmental historians from around the world including scholars from South Africa Brazil Germany and China

The Politics of Deforestation and REDD+ in Indonesia David Aled Williams, 2023-06-01 This book reflects on Indonesia's recent experience with REDD Reducing Emissions from Deforestation and forest Degradation all set within a broader discussion of neoliberal environmentalism hyper capitalism and Indonesian carbon politics Drawing on the author's political ethnographic fieldwork conducted in Jakarta Central Sulawesi and Oslo where the author examined Norway's interests and role in implementing REDD this book discusses the long evolution of the idea that foreign state and private financing can be used to protect tropical forests and the carbon stored within them resulting in both local economic development and global climate benefits It shows how neoliberal environmental approaches to climate change of which REDD is a leading example increase the severity of political contestations that must be overcome to reach global climate mitigation goals and how recent incarnations of REDD have tended to forget earlier scholarly advice to couple anti deforestation approaches with policies that reduce industrial carbon emissions In Indonesia tectonic political and economic forces are shown to have negatively impacted REDD implementation Using a political ecology approach the book links the literature on REDD with that covering Indonesia's recent democratic regression highlighting how the country's environmental performance is inextricably linked to the timbre of its political governance Given the severity of the political contestations that must be overcome to reach its stated goals REDD cannot replace global policies that drastically reduce industrial carbon emissions This book will be of great interest to students and scholars of political ecology deforestation

climate change environmental politics natural resource management and environmental conservation Gary Bryner, *The Historical Dictionary of Environmentalism* strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries *The Politics of Environment in Southeast Asia* Philip Hirsch, Carol Warren, 2002-01-31 The environment in Southeast Asia is now a major issue of topical concern First book to give analysis in depth of the political processes involved in environmental disputes Provides a good selection of case studies in the region Questions the assumption that the middle classes are in the vanguard of the environmental movement
