Russia's war with Ukraine, global climate change, new technologies and challenges to democracy. It advances the discussion from the previous editions on the dynamics of the capitalist world economy and the constant tension between the global scale of economic processes and the territorialization of politics in the current context of geopolitical change. The chapters have been updated with new examples, new sections on global climate change, populism and the growing threat of global war. The book offers a framework to help students make their own judgements of how we got where we are today and what may or should be done about it. Imperialism P. J. Cain, 2002-07-11 The year 2002 sees the centenary of J. A. Hobson's *Imperialism: A Study*, the most influential critique of British imperial expansion ever written. P. J. Cain marks the occasion by evaluating for the first time Hobson's writings on imperialism from his days as a journalist in London to his death in 1940. The early chapters chart Hobson's progress from complacent imperialist in the 1880s to radical critic of empire by 1898. This is followed by an account of the origins of Imperialism and a close analysis of the text in the context of contemporary debates. Two chapters cover Hobson's later writings showing their richness and variety and analysing his decision to republish *Imperialism* in 1938. The author discusses the reception of *Imperialism* and its emergence as a classic by the late 1930s and ends with a detailed discussion of the relevance of the arguments of *Imperialism* to present-day historians. *The Early Voting Behaviour in*

Mizoram: 1972-1987 Dr. H. Laldinmawia, 2020-12-21 My heartiest gratitude goes to my father who left on the 13th March 2005 whose love and inspiring messages put me up to this success. His insight, visions of selfless sacrifice pushes me to go on. It is distressful to celebrate when he is no more to rejoice along. This book is dedicated to His Memorial. I am deeply grateful to my beloved mother Lalengmawii Colney for her love, encouragement and prayers all through the work. The study would not be in its present form without her constant moral support and suggestions. Last but not by any means least, I thank to Almighty God for giving me good health and strength, time and financial blessing to finish this manuscript. The views expressed in the book are entirely of the author and the others are duly cited in the text. Needless to say that the omissions in the study are either of ignorance or of negligence and the mistake; the sole responsibility lies with the scholar. Raising

Cartographic Consciousness Mark Polelle, 1999-01-01 In this book Mark R. Polelle presents an overview of the evolution of geopolitical thought in three national contexts: the United States, Britain and Germany from 1870 to the present. Polelle examines in particular the rise of the defense intellectual and shows how the measurement of national power has changed. Geopolitics early in the century assumed the centrality of space and territory, but by the close of the century with despatialized concerns over geo-economic conflicts, e.g. that between Japan and the United States, Polelle explains this shift by putting it into historical context. His use of both historical and geographical methods makes *Raising Cartographic Consciousness* a valuable book for historians, geographers and political scientists. *International Encyclopedia of Human Geography*
