Political Limits Of Environmental Regulation Tracking The Unicorn:

The Political Limits of Environmental Regulation Bruce Yandle, 1989-09-21 The unicorn in the title of this microeconomic critique of pollution control refers to the tension between environmentalists who seek to create a risk free society and those who perceive the need to balance economic efficiency and productivity against the effects of pollution Yandle sides with the latter group characterizing the proponents of the environmental revolution responsible for the massive diversion of resources to pollution control as sometimes overzealous romantics Though he agrees with conservatives such as M Weidenbaum R Litan and W Nordhaus who argue that the costs of complying with environmental standards outweigh their social benefit Yandle is sensitive to the political context of environmental rule setting that produces the unicorn He cites competing pressures upon Congress as well as conflicts and unusual coalitions among environmental groups as reasons for the durability of the unicorn ISBN 0 89930 431 1 39 95 *The Political Limits of Environmental Regulation* Bruce Yandle, 1989-09-21 In *The Political Limits of Environment Regulation* Bruce Yandle analyzes the Environmental Protection Agency's EPA twenty year record and concludes that the agency's monopoly powers have not always been conducive to positive environmental results In fact Yandle argues special interest groups and lobbyists have often been very successful in obtaining federal legislation favoring large industries In constructing his argument Yandle provides a detailed overview of the EPA's twenty year efforts at environmental regulation based on numerous empirical investigations aimed at identifying the chief elements of both major and minor regulatory episodes Yandle begins by exploring the origins of the U S environmental saga and the status of environmental protection before federal regulation He goes on to discuss the rise of the federal regulator and such issues as cost minimization and the move to manage hazardous and toxic wastes Turning to a discussion of the effects of U S environmental regulation efforts Yandle concludes that the EPA has not been as effective as it could be and recommends that state and local governments be given more responsibility for ensuring environmental protection He suggests further that the country return to competitive regulation cost efficient pollution control legislation flexibility on a state level and divestiture of the EPA's monopoly in this domain arguing that these combined actions will enable the EPA and state legislatures to control and protect the environment more efficiently **Environmental Politics** Norman Miller, 2017-12-19 At every stage environmental policy is the result of the combat of stakeholders interested in and affected by the problem being addressed and the range of possible solutions The combatants include any or all of the following the federal government environmental advocacy groups and business the media the scientific community think tanks NGOs of every stripe trade associations and professional organizations and even state and local governments each of whom have their own interests in the resulting policy *Environmental Politics* Interest Groups the Media and the Making of Policy discusses political battles over the environment from ground level as they are fought in legislative chambers the daily newspaper on television and increasingly on the Internet The text explores environmental politics as a clash of interests not

ideologies and environmental policy as a result of the reconciliation of those interests The author covers not only the conventional aspects of the policymaking process but more recent and less recognized elements and developments such as Proliferation of legislative riders and monument designations as major environmental strategies Evolving role of the media from science popularizer to agenda setter Growing influence on both Congress and the public of conservative and libertarian foundations and think tanks Devolution of environmental power from the Federal to state governments Metamorphosis of EPA in a business driven regulatory revolution Effect of globalization on US environmental policy Newly emerging role of the precautionary principle in marrying science and politics Increasing role of the Internet in promoting populist issues and promoting the decentralization of the environmental power structure No other book covers the politics of the environment the way this one does Written by an expert with 25 years of experience in environmental policymaking **Environmental Politics Interest Groups the Media and the Making of Policy** gives you an insider's view of how policies are forged By examining these issues through an interest group lens this book not only accounts for what policies have been adopted but also shows how you can influence policy and effect change

Transnational Politics of the Environment Liliana B. Andonova, 2003-11-21
A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In **Transnational Politics of the Environment** Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards **Transnational Politics of the Environment** challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics

Political Environmentalism: Going Behind the Green Curtain Terry Lee Anderson, 2000 **Regulation Through Revelation** James Hamilton, 2005-08-29 This 2005 text discusses the US Toxics Release Inventory Program and its impacts as a case study of legislation

Environmental Choices Lawrence S. Rothenberg, 2002-02-01 Within a federal

system government agencies and regulatory policies can be fractured even at odds with each other National actors share power with their counterparts in states and localities as do presidents with Congressional leaders and bureaucrats with judges Understanding the broad economic and political contexts of environmental policymaking illuminates the motivations behind policy choices of various interested parties from the National Park Service and the EPA to environmental activists and members of Congress Rothenberg utilizes basic economic ideas to provide not only a fresh look at how the U S deals with environmental ills but a way of thinking about policy making in general

An Analytical Framework of Environmental Issues Mr.Jonathan Levin,1993-06-01 Environmental effects which were insignificant in the past when the fewer concentrations of population or products of modern technology allowed the vast absorptive capacity of nature to act as a sink are quite evident today in the pollution of air or water the overuse of potentially renewable fishing or forestry resources or the wasteful extraction of nonrenewable mineral resources To contribute to an overall understanding of environmental issues this paper sets out a general analytical framework encompassing the physical character of environmental problems the behavioral factors that contribute to them and the principal approaches to their prevention and correction

The Political Economy of Smog in Southern California Jeffrey Fawcett,2017-10-19 This study first published in 1990 explores the ways in which institutions can succeed or fail at environmental improvement The author first takes a look at the nature of environmental politics and the history of air pollution control in Southern California He then develops a political economic model that asks the question what effect have the dramatic changes that have occurred throughout the history of air pollution control in Southern California had on air quality Jeffrey Fawcett uses the information gathered to both evaluate the relationship between air quality and institutional change and to evaluate how political economists explain how state environmental institutions work This title will be of interest to students of environmental economics and policy
