McDowell,2006 Markus McDowell examines how the literature of the Second Temple period portrays women at prayer through an examination of the literary context and character of those prayers The goal of this work is a greater understanding of how women were portrayed in literary sources and an offering of some fresh insights for the study of women s religious and social roles in the ancient world The texts are

analyzed and categorized within five areas social location content form occasion and gender perspective The prayers are also compared and contrasted with men s prayers in the same sources The analysis includes locating as much as possible the historical literary and cultic context of each document in which these prayers appear By examining all prayers in these texts uttered by women not just prayers of named or prominent women and then comparing them with all the prayers of men in those same texts certain patterns appear This study adds to our knowledge of women and religion in Second Temple Judaism by primarily exploring patterns that appear among the prayers in the literature of the Second Temple period While there are fewer prayers by women than men in this literature the prayers of women are not portrayed as significantly different from those of men in terms of social location content form or occasion At the same time the prayers of women exhibit other patterns of language and in a minor way form and occasion that differ from the prayers of men **Effective Prayers** Philip J Spurling,2005-12

children's beliefs and behaviors and to intervene in the period's tumultuous religious and political debates. The author's attention to the fine details of the period's religious and political swings drawn from sources such as royal proclamations, sermons, and first-hand accounts of book burnings creates a fuller context for her analysis of the legacies. Similarly, Heller explains the appeal of the genre by connecting it to social factors including mortality rates and inheritance practices. Analyses of related genres such as conduct books and fathers' legacies highlight the unique features and functions of mothers' legacies. Heller also attends to the personal side of the genre, demonstrating that a writer's education, marriages, children, and turns of fortune affect her work within the genre.
