Precarious Global Incandescence:

Narratives of Precarious Migrancy in the Global South Gigi Adair, Carly McLaughlin, 2025-02-14 This volume sets out to challenge and expand Anglophone literary migration studies in the global North with a two fold approach It proposes precarious migrancy as a conceptual framework to capture hitherto neglected aspects of subaltern displacement and it turns to the global South as a site of knowledge production about migration The chapters discuss literary narratives originally written in Chinese Kurdish and Italian as well as English and covering a wide geographical range to ask what experiences and understandings of migration emerge from Southern perspectives Across the volume precarious migrancy emerges as a key concept for understanding contemporary globalization in general and migration in the global South in particular The chapters offer significant reconceptualizations of precarity and migrancy by reading Southern literatures of migration as a mode of theorization of the contemporary world contributing to the ongoing shift in framings of migration in Anglophone and postcolonial literary studies This volume will be of significant interest to scholars in literary migration studies global South studies and postcolonial studies It offers readings of rarely studied literary texts as well as new concepts for scholars interested in understanding the nexus of literature and migration today Precarious Global Incandescence Marilyn

Concrete Utopianism Gary Wilder, 2022-08-09 Finalist 2022 Big Other Book Award for Nonfiction Never before has it been more important for Left thinking to champion expansive visions for societal transformation Yet influential currents of critical theory have lost sight of this political imperative Provincial notions of places periods and subjects obstruct our capacity to invent new alignments and envision a world we wish to see Political imagination is misread as optimism Utopianism is conflated with idealism Revolutionary traditions of non liberal universalism and non bourgeois humanism are rendered illegible Negative critique becomes an end in itself

Pessimism is mistaken for radicalism and political fatalism risks winning the day In this book Gary Wilder insists that we place solidarity and temporality at the center of our political thinking He develops a critique of Left realism Left culturalism and Left pessimism from the standpoint of heterodox Marxism and Black radicalism These traditions offer precious resources to relate cultural singularity and translocal solidarity political autonomy and worldwide interdependence They develop modes of immanent critique and forms of poetic knowledge to envision alternative futures that may already dwell within our world traces of past ways of being knowing and relating that persist within an untimely present or charged residues of unrealized possibilities that were the focus of an earlier generation s dreams and struggles or opportunities for dialectical reversals embedded in the contradictory tendencies of the given order Concrete Utopianism makes a bold case for embracing what Wilder calls a politics of the possible impossible Attentive to the non identical character of places periods and subjects insisting that axes of political alignment and contestation are neither self evident nor unchanging reworking Lenin s call to transform the imperial war into a civil war he invites Left thinkers see beyond inherited distinctions between here and there now and then us and them Guided by the spirit of Marx s call for revolutionaries to draw their poetry from a future they cannot fathom yet must nevertheless invent he calls for practices of anticipation that envision and enact call for and call forth seemingly impossible ways of being together He elaborates a critical orientation that emphasizes the dialectical relations between aesthetics and politics political imagination and transformative practice concrete interventions and revolutionary restructuring past dreams and possible worlds means of struggle and its ultimate aims This orientation requires nonrealist epistemologies that do not mistake immediate appearances with the really real Such epistemologies would allow critics to recognize uncanny and untimely aspects of social life whether oppressive or potentially emancipatory They may help actors to render the world subversively uncanny and untimely They may clear pathways for the kind of critical internationalism and concrete utopianism that Left politics cannot afford to ignore Economic Geography Trevor J. Barnes, Brett

Christophers, 2018-01-09 This volume in the celebrated Critical Introductions to Geography series introduces readers to the vibrant discipline of economic geography The authors provide an original definition of the discipline and they make a strong case for its vital importance in understanding the dynamic interconnections movements and emerging trends shaping our globalized world Economic Geography addresses the key theories and methods that form the basis of the discipline and describes its communities of practice and relations to related fields including economics and sociology Numerous illustrative examples explore how economic geographers examine the world and how and why the discipline takes the forms it does demonstrating the critical value of economic geography to making sense of globalization uneven development money and finance urbanization environmental change and industrial and technological transformation Engaging and thought provoking Economic Geography A Critical Introduction is the ideal resource for students studying across a range of subject areas as well as the general reader with an interest in world affairs and economics **What Is Progress** Aldo Schiavone, 2021-07-13

Historian Schiavone mixes philosophy politics and anthropology in this stimulating inquiry into the paradigm of progress Publishers Weekly Today many believe that progress is a word to be avoided a relic from a past the dangerous product of an era of intellectual naivety that would be best forgotten Yet the idea of progress is rooted in a human impulse that is both profound and essential a way of interpreting history without which our ability to plan the future and our very identity would be at stake Written just before the onset of the Coronavirus pandemic which is now putting its argument to the hardest of tests this lucid essay explores how science and technology have been and can still be a powerful engine for human advancement
