Preliminary Overview of the Economies of Latin America and the Caribbean 2005 United Nations: Economic Commission for Latin America and the Caribbean, 2006-04 This annual publication examines the economic performance of the Latin American and Caribbean region as a whole and of individual countries for the year 2005 as well as assessing the outlook for 2006 The regional economy grew for a third consecutive year in 2005 with an estimated GDP growth of 4.3 per cent with a projected GDP growth rate in 2006 of 4.1 per cent Per capita GDP is estimated to have risen by about 3 per cent the unemployment rate fell from 10.3 per cent in 2004 to 9.3 per cent in 2005 and poverty indices showed a decrease But the region is growing at lower rates than developing countries as a whole 5.7 per cent GDP growth in the period 2003-2006 Latin American and Caribbean sub regions show distinctive behaviours the Southern Cone Argentina Chile Uruguay and the Andean Community countries and to a certain extent the Caribbean registered higher growth than Mexico and Central America

Preliminary Overview of the Economies of Latin America and the Caribbean 1999 United Nations. Economic Commission for Latin America and the Caribbean, 1999 Abstract In 1999 Latin America was once again influenced by the adverse international economic environment which had a decisive impact on the countries economic policies and performance As a consequence of the continuing decline in the prices of non fuel commodities together with unstable and deteriorating terms and conditions for external financing the net transfer of resources for the region as a whole was negative for the first time since 1990 and the previous trend towards a widening deficit in the current account of the balance of payments became untenable The corresponding correction was associated with a downturn in domestic demand and imports that translated into the virtual stagnation of the region's gross domestic product The region also witnessed a further deterioration in the employment situation Nonetheless inflation held steady at around 10% for the region as a whole despite more flexible foreign exchange policies and the resulting devaluation of many countries currencies The South American countries were the hardest hit by external problems and intraregional trade mainly of manufactures fell sharply In contrast Mexico and the Central American and Caribbean countries were able to take advantage of the burgeoning United States market to boost their exports and their

levels of economic activity thereby counteracting the detrimental effects of the international financial crisis. As the year proceeded, the growth of the world economy, the progressive normalization of capital flows, improving commodity prices, and the adoption of macroeconomic policies that were more conducive to economic reactivation combined to produce the first glimmers of an upswing in economic activity which is expected to take firm hold in the year 2000.

Latin America and Global Capitalism William I. Robinson, 2008-11-24 2009 Best Book International Political Economy Group of the British International Studies Association. This ambitious volume chronicles and analyzes from a critical globalization perspective the social, economic, and political changes sweeping across Latin America from the 1970s through the present day. Sociologist William I. Robinson summarizes his theory of globalization and discusses how Latin America's political economy has changed as the states integrate into the new global production and financial system, focusing specifically on the rise of nontraditional agricultural exports, the explosion of maquiladoras, transnational tourism, and the export of labor and the import of remittances. He follows with an overview of the clash among global capitalist forces: neoliberalism and the new left in Latin America, looking closely at the challenges and dilemmas resistance movements face and their prospects for success. Through three case studies, the struggles of the region's indigenous peoples, the immigrants' rights movement in the United States, and the Bolivarian Revolution in Venezuela, Robinson documents and explains the causes of regional socio-political tensions, provides a theoretical framework for understanding the present turbulence, and suggests possible outcomes to the conflicts. Based on years of fieldwork and empirical research, this study elucidates the tensions that globalization has created and shows why Latin America is a battleground for those seeking to shape the twenty-first century's world order.

Market Liberalizations and Emigration from Latin America Jon Jonakin, 2017-10-31. Market Liberalizations and Emigration From Latin America provides a comprehensive analysis of the impact of the era of liberalization in Latin America, focusing in particular on labor markets and emigration from the region. Starting in 1980, liberalization in Latin America was expected to improve market functioning, efficiency, and welfare. Instead, it yielded slower growth, unexpectedly high levels of unemployment, and income inequality. Flat or falling wages, an increase in the non-tradeable service sector, and informal activity, and finally waves of emigration from Mexico, Central America, and Ecuador among other countries. This book provides a heterodox narrative explanation of why the orthodox economic model that underwrote the standard trickle-down account served more to obscure and obfuscate than to explain and clarify the state of affairs. The book investigates the impact of the global-scale liberalizations of markets for goods and physical and finance capital, and the mere national-scale liberalization of regional labor markets, arguing that these asymmetric liberalizations together resulted in labor market failure and contributed in turn to the subsequent undocumented migrant flow. The ultimate effect of the skewed scale of market liberalizations in Latin America disproportionately benefited capital at the expense of labor.
