Pritchard,Robert B. Thompson,Robert Thompson,2023 This comprehensive history of modern US securities law illustrates the key jurisprudential changes at the Supreme Court since the New Deal The authors use the justices internal memos notes and preliminary drafts to tell the story of how they actually decided the cases The securities laws were an ambitious expansion of the administrative state That expansion required a transformation of the Court s approach to business regulation abandoning the Court s prior hostility to government intervention **Water Works Engineering** ,1928 *Information Theory Meets Power Laws* Lukasz Debowski,2020-12-10 Discover new theoretical connections between stochastic phenomena and the structure of natural language with this powerful volume *Information Theory Meets Power Laws Stochastic Processes and Language Models* presents readers with a novel subtype of a probabilistic approach to language which is based on statistical laws of texts and their analysis by means of information theory The distinguished author insightfully and rigorously examines the linguistic and mathematical subject matter while eschewing needlessly abstract and superfluous constructions The book begins with a less formal treatment of its subjects in the first chapter introducing its concepts to readers without mathematical training and allowing those unfamiliar with linguistics to learn the book s motivations Despite its inherent complexity *Information Theory Meets Power Laws Stochastic Processes and Language Models* is a surprisingly approachable treatment of idealized mathematical models of human language The author succeeds in developing some of the theory underlying fundamental stochastic and semantic phenomena like strong nonergodicity in a way that has not previously been seriously attempted In doing so he covers topics including Zipf s and Herdan s laws for natural language Power laws for information repetitions and correlations Markov finite state and Santa Fe processes Bayesian and frequentist interpretations
