*Manual of Galician Linguistics* Xulio Sousa, Ernesto González Seoane, 2024-11-04 The Manual of Galician Linguistics provides a comprehensive and accessible overview of the current situation of the Galician language and introduces its readers to the most important topics of current linguistic research on Galician. The volume includes chapters covering diachronic and synchronic descriptions of all main areas of language structure: phonetics, phonology, morphology, syntax, and lexicology, as well as chapters on social and regional variation, language contact, sociolinguistics, language variation, and other interesting areas of linguistic research. Rich in descriptive details and grounded in modern linguistic theory, this manual will be an essential research tool for students and researchers who are interested in the Galician language and in Romance linguistics. **The Acquisition of Spanish** Silvina Montrul, 2004-01-01 This is the first book on the acquisition of Spanish that provides a state-of-the-art comprehensive overview of Spanish morphosyntactic development in monolingual and bilingual situations. Its content is organized around key grammatical themes that form the empirical base of research in generative grammar: nominal and verbal inflectional morphology, subject and object pronouns, complex structures involving movement, topicalizations, questions, relative clauses, and aspects of verb meaning that have consequences for syntax. The book argues that Universal Grammar constrains all instances of language acquisition and that there is a fundamental continuity between monolingual, bilingual child and adult early grammatical systems. While stressing their similarities with respect to linguistic representations and processes, the book also considers important differences between these three acquisition situations with respect to the outcome of acquisition. It is also shown that many linguistic properties of Spanish are acquired earlier than in English and other languages. This book is a must-read for those interested in the acquisition of Spanish from different theoretical perspectives, as well as those working on the acquisition of other languages in different contexts.
