Saponins in Food, Feedstuffs and Medicinal Plants Wieslaw Oleszek, A. Marston, 2014-01-15 Saponins in Food, Feedstuffs and Medicinal Plants W. Oleszek, A. Marston, 2013-03-09 Saponins are glycosides of triterpenes steroids or steroidal alkaloids They can be found in plants and marine organisms Very diverse biological activities are ascribed to saponins and they play important roles in food animal feedstuffs and pharmaceutical properties This volume provides a selection of recent work on saponins presented at a symposium in Pulawy Poland in 1999 Many different aspects are treated analysis separation biological activities relevant use in human and animal nutrition and ecological significance This book will be of use to researchers both in universities and industry Natural Products Chemistry of Botanical Medicines from Cameroonian Plants Xavier Siwe-Noundou, 2021-09-28 A contribution to the series on Natural Products Chemistry of Global Plants Natural Products Chemistry of Botanical Medicines from Cameroon focuses on the sources and chemistry of natural products from plants in Cameroon West Africa The plants selected offer an opportunity to trace a route through history from ancient civilizations to the modern day showing the important value to man of natural products in medicines and in foods This book highlights how many of the extracts from Cameroon are today associated with important drugs nutrition products beverages perfumes cosmetics and pigments as well as presenting their complex chemistry and structure Key Features Forms an important part of the series on Natural Products Chemistry of Global Plants as Cameroon is a country with rich experience in the use of medicinal plants and with a wide diversity of botanical resources Addresses the current development of pharmacognosy research in Cameroon Provides readers with updated information on the chemistry and pharmacology of natural products with pharmaceutical potential Covers an extensive range of chemical botanical and pharmacological diversities Xavier Siwe Noundou is a Scholar Scientist based at Rhodes University in Grahamstown South Africa He has been a EU FP7 Marie Curie Fellow 2015 2016 Kaposvar University in Hungary 2015 2016 Trakia University in Bulgaria 2016 TWAS Fellow 2013 National Research Foundation South Africa Fellow 2014 2016 Dr Noundou works on Medicinal Chemistry focusing on Chemistry Pharmacognosy and Nanotechnology His main research interests include terrestrial natural products chemistry from Cameroon and South Africa and marine natural products chemistry from the South African coastline bioactive metabolites isolated as potential antiparasitic antimicrobial antiviral and antiproliferative candidates He is author of more than forty scientific publications in his field of expertise Novel Food and Feed Safety Safety Assessment of Foods and Feeds Derived from Transgenic Crops, Volume 1 OECD, 2015-04-03 These science based consensus documents contain information for use during the regulatory assessment of food feed products of modern biotechnology i e developed from **Medicinal Plant Biotechnology** Rajesh Arora, 2010 Covering the latest advances in the use of plants transgenic crops to produce medicinal drugs and vaccines examines topics including plant tissue culture secondary metabolite production metabolomics and metabolic engineering bioinformatics molecular farming and future biotechnological directions

Natural Food Antimicrobial Systems A.S. Naidu, 2000-06-21 Consumer concerns play a critical role in dictating the direction of research and development in food protection. The rising demand for minimally processed foods growing concerns about the use of synthetic preservatives and suspected links between the overuse of antibiotics and multi drug resistance in microbes has made food safety a global priority Natural Food Antimicrobial Systems focuses on advances in the technology of food safety Numerous antimicrobial agents exist in animals and plants where they evolved as defense mechanisms For example the antimicrobial components of milk have been unraveled in recent years The book covers how these components such as lactoferrin can be used as multifunctional food additives such as antioxidants and immuno modulating agents The six sections cover lacto antimicrobials ovo antimicrobials phyto antimicrobials bacto antimicrobials acid antimicrobials and milieu antimicrobials Each chapter provides background and historical information molecular properties antimicrobial activity biological advantage applications safety tolerance and efficacy and biotechnology To satisfy the rapidly changing consumption patterns of the global market the food processing industry continuously searches for new technologies in food science Designed as a reference for academia and corporate R D Natural Food Antimicrobial Systems fills this need offering in depth information on emerging biotechnology efficacy and applications of natural food antimicrobial systems Performance Liquid Chromatography in Phytochemical Analysis Monika Waksmundzka-Hajnos, Joseph Sherma, 2010-11-08 The powerful efficient technique of high performance liquid chromatography HPLC is essential to the standardization of plant based drugs identification of plant material and creation of new herbal medicines Filling the void in this critical area High Performance Liquid Chromatography in Phytochemical Analysis is the first book to give a comp Chromatography in Phytochemistry Monika Waksmundzka-Hajnos, Joseph Sherma, Teresa Kowalska, 2008-03-04 Thin layer chromatography TLC is increasingly used in the fields of plant chemistry biochemistry and molecular biology Advantages such as speed versatility and low cost make it one of the leading techniques used for locating and analyzing bioactive components in plants Thin Layer Chromatography in Phytochemistry is the first sourc Therapeutic Medicinal Plants Marta C.T. Duarte, Mahendra Rai, 2015-11-16 Medicinal plants have been used in the prevention diagnosis and elimination of diseases based on the practical experience of thousands of years There is a pressing need to initiate and transform laboratory research into fruitful formulations leading to the development of newer products for the cure of diseases such as AIDS cancer Bioactive Molecules in Plant Defense Mostafa Abdelrahman, Sudisha Jogaiah, 2020-11-28 This book presents and hepatitis a broad perspective on saponins as important natural products with a key role in plant defense The presence of saponins has been reported in several plant species and many types of saponins have been found to exhibit significant antifungal activities In addition to their role in plant defense saponins are of increasing interest for drug research as they are active ingredients in several traditional medicines and hold potentially valuable pharmacological properties. In this book the authors briefly introduce readers to saponin accumulation in various plant organs with a specific focus on their structure classification and

diversity Readers will find detailed information on the saponin structure activity relationship and saponins vital role in sustainable agriculture as a chemical barrier to pathogen attack The latest techniques for isolating identifying and quantifying saponins are also discussed In the closing chapter the authors outline the recent metabolic engineering strategies applied to improve saponin glycosides production and their potential applications in plant disease resistance This book and the companion volume Bioactive Molecules in Plant Defense Signaling in Growth and Stress offer vital resources for all researchers and students interested in plant pathology mycology and sustainable agriculture Bharqava, Shilpi Srivastava, 2013-09-23 Quinoa is an invaluable crop highlighted by the Food and Agriculture Organization of the United Nations FAO as one of the world's main crops for future food security. The first comprehensive review of quinoa this book includes four sections covering the history of the crop phylogeny and systematics botany and agrotechnology and the qualitative aspects economics and marketing of quinoa making it a vital resource for students and researchers of crop science Aromatic and Medicinal Plants of Drylands and Deserts David Ramiro Aquillón-Gutiérrez, Cristian Torres-León, Jorge Alejandro Aguirre-Joya, 2023-05-02 The description and analysis of the Mexican and other countries desertic plants from the point of view of their use in traditional medicine and their potential use in integrative medicine is the overall theme of this book Aromatic and Medicinal Plants of Drylands and Deserts Ecology Ethnobiology and Potential Uses describes the historic use of drylands plants botanical and geological classification also describes the endemic plants used in traditional medicine going through the most relevant aspects of biomedicine and integrative medicine The chemical and bioactive compounds from desertic medicinal and aromatic plants and the analytic techniques to determine chemical and bioactive compounds from the medicinal and aromatic plants are reviewed Ethnobiology is detailed in the present book as well as the importance of the integrative medicine for the ancient and actual cultures. The book represents an effort to keep the ethnobiological knowledge of communities for the use of traditional desertic plants with the actual analytical techniques to unveil the chemical molecules responsible of the biological or biomedical applications Features Describes the endemic plants used in traditional medicine Includes the chemical and bioactive compounds from desertic medicinal plants Addresses the analytic techniques to determine chemical and bioactive compounds Represents an effort to keep the ethnobiological knowledge of communities To execute this book there are collaborations by authors from different institutions in northern Mexico which is where the arid and semi arid ecosystems of the country are found Although the subject of medicinal plants has been treated from different angles this book offers a holistic and comprehensive vision of these important organisms of the Mexican desert thus resulting in an updated work for specialized readers and for those who are beginning in this exciting Bioactive Secondary Metabolites from Medicinal Plants of Africa Aman Dekebo, 2025-07-31 This book theme provides a comprehensive overview of bioactive compounds derived from African traditional medicinal plants shedding light on their potential applications in modern medicine It compiles crucial information on compounds with proven in vitro and in

vivo activity against various diseases providing a foundation for further research in drug discovery. The book also introduces the use of these bioactive secondary metabolites in cosmetics nutrition and pest control with detailed description of medicinal plant species including their botanical names ethnomedicinal uses and pharmacological activities making it an invaluable resource for researchers and pharmaceutical companies Key concepts include the exploration of secondary metabolites from plants in Ethiopia Egypt Kenya Uganda Zimbabwe Cameroon Tanzania Madagascar and Nigeria and their industrial applications. The chapters cover ethnobotanical knowledge bioactivities and chemical profiling of these plants including the ethnobotanical and phytochemical studies of Ethiopian flora the role of rose scented geranium in the perfume industry and the use of fruits and vegetables in treating respiratory ailments Readers will also discover insights into the use of secondary metabolites for pest control the conservation strategies for endangered African plants and the synthesis of bio nanoparticles for therapeutic applications The book presents a detailed analysis of medicinal plants with anti malarial antileishmanial improve sexual desire and antimicrobial properties highlighting their significance in traditional and modern medicine This volume is an essential resource for researchers graduate students and professionals in the fields of natural products phytochemistry and pharmaceuticals It provides a unique perspective on the integration of traditional African medicine with contemporary scientific research offering valuable insights into the potential of these bioactive compounds in Advances in Carbohydrate Chemistry and Biochemistry, 2014-12-02 Since its inception in 1945 drug development this serial has provided critical and informative articles written by research specialists that integrate industrial analytical and technological aspects of biochemistry organic chemistry and instrumentation methodology in the study of carbohydrates The articles provide a definitive interpretation of the current status and future trends in carbohydrate chemistry and biochemistry Features contributions from leading authorities and industry experts Informs and updates on all the latest developments in the field Sustainable Use of Feed Additives in Livestock Georgios Arsenos, Ilias Giannenas, 2023-12-28 This book offers a comprehensive collection of cutting edge research on feed additives for a sustainable animal production including insects and aquaculture In five clearly structured sections the sources of feed additives details on their biochemistry feed security as well as specific applications for individual farm animal species livestock health and product characteristics meat milk and eggs find attention International expert authors provide a full description on the use of aromatic plants extracts and essential oils as feed additives alone or in combination with functional feeds of different categories Readers will explore the potential of feed additives to tackle environmental issues Practical examples include the use of local feedstuffs in combination with herbal additives and enzymes Emphasis is placed on the consequences of using local feed sources versus imported feedstuffs on global warming potential primary energy use nutrient excretion and the feedadditive influence on lessening the pollution from animal operations. The results presented will support realization of the Sustainable Development Goals in particular SDG 12 which stands for Responsible Consumption and Production worldwide

The use of novel and different feed additives can be an important tool to enhance sustainability support productivity and match increased food demands around the globe Animal production depends on feed efficiency to sustain growth and profitability Along these lines the present volume is an essential reading for all future oriented veterinarians animal nutritionists agricultural scientists and moreover the feed food and plant industry Soybean Hany El-Shemy, 2013-02-20 Legumes are important for the diet of a significant part of the world's population they are a good source of protein carbohydrates minerals and vitamins The importance of soybean lies in the overall agriculture and trade and in its contribution to food supply Soybean contains the highest protein content and has no cholesterol in comparison with conventional legume and animal food sources Furthermore soybean is a cheap source of food and at the same time medicinal due to its genistein photochemical isoflavones content Soybean has been found to be extremely helpful in the fight against heart disease cancer and diabetes among others Soybean protein and calories are presently being used to prevent body wasting often associated with HIV The importance of soybean nutrition intervention is amplified where medications are unavailable Its economic potential inherent in a wide range of industrial uses can be harnessed to the benefit of smallholder soybean producers Nutraceuticals Tariq Altalhi, Jorddy Neves Cruz, Inamuddin, 2023-03-31 Nutraceuticals Sources Processing Methods Properties and Applications explores the impact of nutraceutical compounds on human health and their main pharmacological contributions Organized into three parts this book addresses nutraceutical production applications for disease prevention and treatment and current trends especially the role of nutraceuticals in cosmeceutical Nutraceuticals are a class of products that can help people improve their health reduce the risk of disease extend their lives and control the structure and functioning of their bodies However due to multiple hurdles that prevent nutraceuticals from circulating in an active form in the body their use is associated with diminished therapeutic efficacy Recognizing this problem the book explores the root of the nutraceutical delivery system and its codelivery methods with a focus on medicines With contributions from experienced nutraceutical experts this book serves as a valuable reference for nutrition researchers food scientists pharmacologists and those who are researching and studying in related areas Discusses nutraceutical applications and compounds and the current trends in this emerging field Explores the production of nutraceuticals Written and edited by experienced researchers in this field Traditional Medicines for Modern Times Amala Soumyanath, 2005-11-02 The increasing prevalence of diabetes mellitus world wide is an issue of major socio economic concern Scientific interest in plant derived medicine is steadily rising yet there is often a wide disparity in the caliber of information available A detailed compilation of scientific information from across the globe Traditional Medicines for Modern **Bioactive Ingredients for** Healthcare Industry Volume 2 Dibyajit Lahiri, Moupriya Nag, Debasmita Bhattacharya, Siddhartha Pati, Tanmay Sarkar, 2025-05-10 This book provides in depth knowledge on the use of various bioactive compounds obtained from natural sources as therapeutics and healthcare solutions The chapters emphasize on the role of bioactives in managing various types

of chronic diseases and emerging healthcare challenges comprising of neurodegenerative disorders cardiovascular diseases and various metabolic syndromes The book presents various advanced techniques for bringing about optimization in the bioactivity enhancement of the delivery systems and ensuring the efficiency of the therapeutics Aimed at researchers healthcare professionals and industry stakeholders Volume 2 serves as a comprehensive resource to understand the application of various types of bioactive compounds in mitigating various health associated problems of Plants and Their Products in Neurodegenerative Diseases Management Johnson O. Oladele, Ebenezer I. O. Ajayi, María L. Flores-López, Oluwaseyi E. Okoro, 2025-08-11 Neurodegenerative illnesses have negative impacts on the central and peripheral nervous system which in turn affect brain health Sustainable Use of Plants and Their Products in Neurodegenerative Diseases Management addresses the prevalence and pathogenesis of neurodegenerative diseases and the roles of phytoconstituents in mitigating the progression of neurodegenerative diseases It provides a molecular understanding of the pathophysiology underpinning neurodegenerative diseases the role of herbal plant products and their phytoconstituents in the treatment of these diseases and practical strategies to prevent these pathological conditions Features Contains the latest molecular and cellular based research findings on medicinal plants in brain health and neurodegenerative diseases Explains practical strategies to prevent neurodegenerative diseases using medicinal plants and their phytoconstituents Sustainable Use of Plants and Their Products in Neurodegenerative Diseases Management opens new research areas for academia and scientists enhances student knowledge in pharmacognosy medicine pharmaceuticals biomedical and biological sciences and other related fields of studies and enables traditional healers and clinicians to make recommendations for their neurological patients
