Saros Cycle Dates And Related Babylonian Astronomical Texts:

Saros Cycle Dates and Related Babylonian Astronomical Texts Asger Aaboe, 1991 These texts are probably from Babylon although their exact provenance is unknown All concern luni solar phenomena with the exception of a text on the last visibility of Mercury which is found on one side of a tablet whose other side deals with lunar eclipse magnitudes the other treats solar eclipse possibilities Included in this group is B M 34597 known as the Saros Canon which is repub to correct errors in previous pub to clarify its structure The 2nd group contains astronomical functions Illustrations

Cuneiform Texts in the Metropolitan Museum of Art Metropolitan Museum of Art (New York, N.Y.), Wilfred G. Lambert, Eva Von Dassow, 1988 Volume One 120 ancient Mesopotamian texts from the Metropolitan Museum's extensive collection of cuneiform tablets are published here in a projected multi volume edition Metropolitan Museum of Art website

Babylonian Mathematical Astronomy: Procedure Texts Mathieu Ossendrijver, 2012-04-24 This book contains new translations and a new analysis of the procedure texts of Babylonian mathematical astronomy the earliest known form of mathematical astronomy of the ancient world The translations are based on a modern approach incorporating recent insights from Assyriology and translation science The work contains updated and expanded interpretations of the astronomical algorithms and investigations of previously ignored linguistic mathematical and other aspects of the procedure texts Special attention is paid to issues of mathematical representation and over 100 photos of cuneiform tablets dating from 350 50 BCE are presented In 2 3 years the author intends to continue his study of Babylonian mathematical astronomy with a new publication which will contain new editions and reconstructions of approx 250 tabular texts and a new philological astronomical and mathematical analysis of these texts Tabular texts are end products of Babylonian math astronomy computed with algorithms that are formulated in the present volume Procedure Texts **Between High and Low T.**

Boiy, 2007 The chronology of the period 323 311 BC from the death of Alexander the Great until the battle of Gaza and the way how Diodor of Sicily depicts it in the books 18 20 of his Universal History has occupied the scholarly world from the nineteenth century onwards Two schools have dominated chronological research the traditional or so called high chronology and its opponent the low chronology These chronological hypotheses disagree by one year at the end of the First Diadoch War and at the end of the Second Diadoch War but the chronological gap is narrowed down to approximately six months at the end of the Third Diadoch War A final complication is that both hypotheses agree on the chronology for the events in Asia Minor following Antipaters return to Europe until Eumenes retreat to the East during the Second Diadoch War The author explores the chronological information in Babylonian Aramaic Egyptian and Lydian source material to reconstruct the events mentioned by Diodor On the basis of Babylonian cuneiform evidence and the date formulas from Aramaic ostraca originating from Idumaea he proposes to combine the low chronology at the beginning with the high chronology later **Astral**

Sciences in Mesopotamia Hermann Hunger, David Pingree, 2015-11-02 Astronomy and astrology or the astral sciences

played an enormous if not a key role in the political and religious life of the Ancient Near East and later of the Greek and Roman world This is the first comprehensive and up to date account of the origins of the astral sciences in the Ancient Near East Every type of Sumerian or Akkadian text dealing with descriptive or mathematical astronomy including many individual tablets are thoroughly dealt with All aspects such as the history of discovery reconstruction and interpretation come to the fore accompanied by a full bibliography At that the reader will find descriptions of astronomical contents an explanation of their scientific meaning and the place a given genre or tablet has in the development of astronomy both within the Mesopotamian culture and outside of it Because celestial omens are intimately related to astronomy in Mesopotamian science these are also discussed extensively The material is arranged both chronologically and thematically so as to help make Astral Sciences in Mesopotamia a reference work on the subject in its truest sense

Calendars in Antiquity Sacha Stern, 2012-09-06 Calendars were at the heart of ancient culture and society and were far more than just technical time keeping devices Calendars in Antiquity offers a comprehensive study of the calendars of ancient Mesopotamia Egypt Persia Greece Rome Gaul and all other parts of the Mediterranean and the Near East from the origins up to and including Jewish and Christian calendars in late Antiquity In this volume Stern sheds light on the political context in which ancient calendars were designed and managed Set and controlled by political rulers calendars served as expressions of political power as mechanisms of social control and sometimes as assertions of political independence or even of sub culture and dissidence While ancient calendars varied widely they all shared a common history evolving on the whole from flexible lunar calendars to fixed solar schemes The Egyptian calendar played an important role in this process leading most notably to the institution of the Julian calendar in Rome the forerunner of our modern Gregorian calendar Stern argues that this common evolutionary trajectory was not the result of scientific or technical progress It was rather the result of major political and social changes that transformed the ancient world with the formation of the great Near Eastern empires and then the Hellenistic and Roman Empires from the first millennium BC to late Antiquity The institution of standard fixed calendars served the administrative needs of these great empires but also contributed to their cultural cohesion

Babylonian Horoscopes Francesca Rochberg, 1998 Interpretations of heavenly phenomena as signs of the future was a Mesopotamian tradition of great antiquity The practice of Babylonian celestial divination spanning a period from ca 1800 B C to Hellenistic times is known in the form of celestial omens portending the life of the king and the stability of the state Emerging for the first time in the fifth century B C horoscopes reflect the application of the ideal and practice of celestial divination to the life of the individual This is the first complete edition of the extant cuneiform horoscopes with transcription and philological and astronomical commentary It is the first study to offer a systematic description of the documents as a definable class of Babylonian astronomical astrological texts

Time and Its Adversaries in the Seleucid Empire Paul J. Kosmin, 2018-12-03 Under Seleucid rule time no longer restarted with each new monarch Instead progressively numbered years identical to the system we use today

became the measure of historical duration Paul Kosmin shows how this invention of a new kind of time and resistance to it transformed the way we organize our thoughts about the past present and future

The Origin of the History of Science in Classical Antiquity Leonid Zhmud, 2008-08-22 This is the first comprehensive study of what remains of the writings of Aristotle's student Eudemus of Rhodes on the history of the exact sciences These fragments are crucial to our understanding of the content form and goal of the Peripatetic historiography of science The first part of the book presents an analysis of those trends in Presocratic Sophistic and Platonic thought that contributed to the development of the history of science The second part provides a detailed study of Eudemus' writings in their relationship with the scientific literature of his time Aristotelian philosophy and the other historiographic genres practiced at the Lyceum biography medical and natural philosophical doxography Although Peripatetic historiography of science failed in establishing itself as a continuous genre it greatly contributed both to the birth of the Arabic medieval historiography of science and to the development of this genre in Europe in the 16th-18th centuries

Astronomical Diaries and Related Texts from Babylonia Abraham Sachs, 1988 A large volume of tablets transliterated by Abraham Sachs and Hermann Hunger of lunar and planetary information dating from the 8th to 1st century BC The first part examines tablets relating to the moon especially eclipse reports the second to the planets and the recurrence of astronomical phenomena An appendix contains a list of eclipse dates

The Heavenly Writing Francesca Rochberg, 2004-09-27 In antiquity the expertise of the Babylonians in matters of the heavens was legendary and the roots of both western astronomy and astrology are traceable in cuneiform tablets going back to the second and first millennia BC The *Heavenly Writing* first published in 2004 discusses the place of Babylonian celestial divination horoscopy and astronomy in Mesopotamian intellectual culture Focusing chiefly on celestial divination and horoscopes it traces the emergence of personal astrology from the tradition of celestial divination and the use of astronomical methods in horoscopes It further takes up the historiographical and philosophical issue of the nature of these Mesopotamian celestial sciences by examining elements traditionally of concern to the philosophy of science without sacrificing the ancient methods goals and interests to a modern image of science This book will be of particular interest to those concerned with the early history of science

Zodiac Calendars in the Dead Sea Scrolls and Their Reception Helen R. Jacobus, 2014-10-30 The ancient mathematical basis of the Aramaic calendars in the Dead Sea Scrolls is analysed in this investigation Helen R. Jacobus re-examines an Aramaic zodiac calendar with a thunder divination text 4Q318 and the calendar from the Aramaic Astronomical Book 4Q208 4Q209 all from Qumran Jacobus demonstrates that 4Q318 is an ancestor of the Jewish calendar today and that it helps us to understand 4Q208 4Q209 She argues that these calendars were taught in antiquity as angelic knowledge described in 1 Enoch and the Book of Jubilees The study also encompasses Babylonian Hellenistic Byzantine astronomy and astrology and classical and Jewish writings Finally a medieval Hebrew zodiac calendar related to 4Q318 with an astrological text is published here for the first time

The Babylonian Theory of the Planets Noel M.

Swerdlow,2014-07-14 In the second millennium b c Babylonian scribes assembled a vast collection of astrological omens believed to be signs from the gods concerning the kingdom s political military and agricultural fortunes The importance of these omens was such that from the eighth or seventh until the first century the scribes observed the heavens nightly and recorded the dates and locations of ominous phenomena of the moon and planets in relation to stars and constellations The observations were arranged in monthly reports along with notable events and prices of agricultural commodities the object being to find correlations between phenomena in the heavens and conditions on earth These collections of omens and observations form the first empirical science of antiquity and were the basis of the first mathematical science astronomy For it was discovered that planetary phenomena although irregular and sometimes concealed by bad weather recur in limited periods within cycles in which they are repeated on nearly the same dates and in nearly the same locations N M Swerdlow s book is a study of the collection and observation of ominous celestial phenomena and of how intervals of time locations by zodiacal sign and cycles in which the phenomena recur were used to reduce them to purely arithmetical computation thereby surmounting the greatest obstacle to observation bad weather The work marks a striking advance in our understanding of both the origin of scientific astronomy and the astrological divination through which the kingdoms of ancient Mesopotamia were governed Originally published in 1998 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Persian Chronology and the Length of the Babylonian Exile of the Jews Rolf Furuli,2003 *Science and Mathematics in Ancient Greek Culture* Christopher Tuplin,Tracey Elizabeth Rihl,2002 Ancient Greece was the birthplace of science which developed in the Hellenized culture of ancient Rome This book written by seventeen international experts examines the role and achievement of science and mathematics in Greek antiquity through discussion of the linguistic literary political religious sociological and technological factors which influenced scientific thought and practice

In the Path of the Moon Francesca Rochberg,2010-05-11 Celestial divination in the form of omens from lunar planetary astral and meteorological phenomena was central to Mesopotamian cuneiform scholarship and science from the late second millennium BCE into the Hellenistic period Beyond the boundaries of ancient Mesopotamia the ideas texts and traditions of Babylonian celestial divination are traceable in Hellenistic sciences and philosophies This collection of essays investigates features of Babylonian celestial divination with special focus on those aspects that influenced later Greco Roman astronomy astrology and theories of signs A multi faceted collection of philological historical and philosophical investigations In the Path of the Moon offers Assyriologists Classicists and historians of ancient science a wide ranging series of studies unified around the theme of Babylonian celestial

divination's legacy The collected essays in this volume successive steps in an ordered path constitute an invaluable contribution to a better understanding of Babylonian divination Lorenzo Verderame Sapienza Universit di Roma The reader interested in the multifaceted presentation of the problems related to the explanation of Babylonian celestial divination and well equipped with the knowledge of Akkadian will certainly be rewarded by the study of Rochberg's latest publication Henryk Drawnel SDB *Pieces and Parts in Scientific Texts* Florence Bretelle-Estabet, Stéphane Schmitt, 2018-06-01 This book starts from a first general observation there are very diverse ways to frame and convey scientific knowledge in texts It then analyzes texts on mathematics astronomy medicine and life sciences produced in various parts of the globe and in different time periods and examines the reasons behind the segmentation of texts and the consequences of such textual divisions How can historians and philosophers of science approach this diversity and what is at stake in dealing with it The book addresses these questions adopting a specific approach to do so In order to shed light on the diversity of organizational patterns and rhetorical strategies in scientific texts and to question the rationale behind the choices made to present such texts in one particular way it focuses on the issue of text segmentation offering answers to questions such as What was the meaning of segmenting texts into paragraphs chapters sections and clusters Was segmentation used to delimit self contained units or to mark breaks in the physical appearance of a text in order to aid reading and memorizing or to cope with the constraints of the material supports How in these different settings and in different texts were pieces and parts made visible

Cuneiform Texts in the Metropolitan Museum of Art: Literary and scholastic texts of the First Millennium B.C.

Metropolitan Museum of Art (New York, N.Y.), 1988 Volume One 120 ancient Mesopotamian texts from the Metropolitan Museum's extensive collection of cuneiform tablets are published here in a projected multi volume edition Metropolitan Museum of Art website **Sun Moon Earth** Tyler Nordgren, 2016-09-13 With beautiful illustrations and a detailed map Sun Moon Earth has everything you need to get ready for the next solar eclipse On April 8 2024 millions of Americans will experience an awe inspiring phenomenon a total eclipse of the sun In Sun Moon Earth astronomer Tyler Nordgren illustrates how this most seemingly unnatural of natural phenomena was transformed from a fearsome omen to a tourist attraction From the astrologers of ancient China and Babylon to the high priests of the Maya Sun Moon Earth takes us around the world to show how different cultures interpreted these dramatic events Greek philosophers discovered eclipses cause and used them to measure their world and the cosmos beyond Victorian era scientists mounted eclipse expeditions during the age of globe spanning empires And modern day physicists continue to use eclipses to confirm Einstein's theory of relativity Beautifully illustrated and lyrically written Sun Moon Earth is the ideal guide for all eclipse watchers and star gazers alike

The Gentile Times Reconsidered Carl Olof Jonsson, 2021-10-21 The Gentile Times Reconsidered by Swedish author Carl Olof Jonsson is a scholarly treatise based on careful and extensive research including an unusually detailed study of Assyrian and Babylonian records relative to the date of Jerusalem's destruction by Babylonian conqueror Nebuchadnezzar

The publication traces the history of a long string of interpretation theories connected with time prophecies extracted from the Bible books of Daniel and Revelation beginning with those from Judaism in the early centuries through Medieval Catholicism the Reformers and into nineteenth century British and American Protestantism It reveals the actual origin of the interpretation which eventually produced the date of 1914 as a predicted year for the end of the Gentile Times a date adopted and proclaimed worldwide to this day by the religious movement known as Jehovah s Witnesses The importance of this date for the exclusive claims of the movement is repeatedly stressed in its publications The Watchtower of October 15 1990 for example states on page 19 For 38 years prior to 1914 the Bible Students as Jehovah s Witnesses were then called pointed to that date as the year when the Gentile Times would end What outstanding proof that is that they were true servants of Jehovah The book contains a helpful discussion of the application of the Biblical prophecy regarding the seventy years of Babylonian domination of Judah Readers will find the information refreshingly different from any other publication on this topic
