**Control** Bernhard Hommel, Stephen B.R.E. Brown, Dieter Nattkemper, 2016-04-02 This textbook provides a comprehensive introduction into the areas of human action planning and action control. It discusses the basic theoretical issues and questions in understanding the planning and control of human goal directed action. The authors begin by presenting an integrative theoretical framework and the neurobiological foundations of action planning and execution. Subsequent chapters discuss how goals are represented and how they guide action control, how perception and action interact, how simple and complex actions are selected and planned, how multitasking works, and how actions are monitored. Topics of interest include stimulus triggered selections, rule based selections, intentional action selections, and intuitive decision making. Human Action Control is a must have resource for advanced undergraduates, graduates, and doctorate students in cognitive psychology and related areas such as the cognitive neurosciences and developmental and social psychology. **Deleuze and World Cinemas** David Martin-Jones, 2011-02-17 Shortlisted for the British Association of Film Television and Screen Studies Annual Book Award. Deleuze's Cinema books continue to cause controversy. Although they offer radical new ways of understanding cinema, his conclusions often seem strikingly Eurocentric. Deleuze and World Cinemas explores what happens when Deleuze's ideas are brought into contact with the films he did not discuss: those from Europe and the USA from Georges Méliès to Michael Mann, and a range of world cinemas including Bollywood blockbusters, Hong Kong action movies, Argentine melodramas, and South Korean science fiction movies. These emergent encounters demonstrate the need for the constant adaptation and reinterpretation of Deleuze's findings if they are to have continued relevance, especially for cinema's contemporary engagement with the aftermath of the Cold War and the global dominance of neoliberal globalization.
