**SAS Jungle Survival** Barry Davies, 2013-01-08 When we think of jungles we often think of a densely forested area with thick foliage this is what is known as a primary jungle But jungles can also include swamps grasslands and cultivated areas Primary jungles can fall into the category of either a tropical rain forest or a deciduous forest depending on the types of trees and plants found growing there A tropical rain forest is typified by having tall trees whose upper branches interlock to form canopies Yet of all the environments in which man has to survive the jungle offers the best chance The SAS have operated in the jungle for years sometimes staying in the forest for months at a time They developed a technique whereby they had two sets of clothing one for daytime use and one for night Just before they went to sleep they would change from their wet clothing which was normally hung under the shelter to dry out In the morning they would change from their dry clothing and put on the wet It is an uncomfortable change but one that guaranteed a good night's sleep in dry clothing The SAS Guide to Jungle Survival will teach the reader to come to terms with the jungle environment understand it and work with it as opposed to fighting it The jungle forest can provide shelter food and water in abundance and this book will show you how If the jungle offers any problems it is with disease and wild animals The SAS Guide to Jungle Survival will show you how to avoid and resist both and come out alive

**SAS Mountain and Arctic Survival** Barry Davies, 2012-12-10 It is difficult to imagine how anyone would enter into a polar or mountainous region unprepared You're prepared for your journey or you arrive by accident for example the aircraft you are traveling in has crash landed over the frozen tundra or your mode of transport has broken down in the wilderness In all cases providing you are uninjured your chances of survival are good Planned travel in a cold or mountainous environment should mean that you are well clothed and equipped In both winter and summer the Northern Arctic offers an abundant supply of water and food shelter can be found or constructed above and below the tree line The real threat comes from the cold injury and simply doing nothing During the Second World War a number of service men became marooned in the arctic wasteland most of them died They did so because few ventured far from their crash site they made no attempt to catch fish hunt game or even attempt to travel south None that were later found had prepared a rescue signal and most had died not from the cold but
