On the Edge of Earth Steven Lambakis,2014-04-23 Interesting and provocative Recommended for anyone interested in space policy and national security affairs Choice The United States has long exploited Earth s orbits to enhance security generate wealth and solidify its position as a world leader America s ambivalence toward military activities in space however has the potential to undermine our future security Some perceive space as a place to defend and fight for America s vital interests Others whose voices are frequently dominant and manifested in public rhetoric funded defense programs international diplomacy and treaty commitments look upon space as a preserve not to be despoiled by earthly strife After forty years of discussion the debate over America s role in space rages on In light of the steady increase in international satellite activity for commercial and military purposes America s vacillation on this issue could begin to pose a real threat to our national security Steven Lambakis argues that this policy dysfunction will eventually manifest itself in diminished international political leverage the forfeiture of technological advances and the squandering of valuable financial resources Lambakis reviews key political military and business developments in space over the past four decades Emphasizing that we should not take our unobstructed and unlimited access to space for granted he identifies potential space threats and policy flaws and proposes steps to meet national security demands for the twenty first century Provides a wealth of details on a wide range of factors that contribute to space power Air Space Power Journal Will trigger public debate generate controversy and add creatively to

the policy debate John D Stempel author of Common Sense and Foreign Policy **Preserving America's Strength in Satellite Technology** James Andrew Lewis,2002 From the Center for Strategic and International Studies comes a report on U S military use of satellites in space as a way to maintain information superiority They explore possible ways to encourage the building of satellite infrastructure by U S companies and examine the military s response to opponents use of satellite imagery and other satellite information They argue that current technology transfer restrictions are actually hurting the U S satellite companies leading to a satellite gap Annotation copyrighted by Book News Inc Portland OR ,
