**Cooperative Monitoring in the South China Sea** John C. Baker, David G. Wiencek, 2002-03-30 The Spratly Islands have represented a potential political and military flashpoint in the South China Sea for years involving as they do various claims by China the Philippines Vietnam Malaysia and Taiwan This edited volume examines the issues involved in light of confidence building measures that new high resolution satellite imagery can offer to this and other regions Baker Wiencek and their contributors assess the potential role for cooperative monitoring in

mitigating the risk of conflict arising from multinational disputes over the Spratly Islands They analyze how this new generation of civilian and commercial observation satellites can be used to reduce the changes of armed conflict breaking out by providing transparency that will detect and identify politically significant activities occurring at disputed islands and reefs among the Spratlys Of particular interest to policy makers scholars and other researchers involved with military issues in Asia and international security concerns      **Security-related Applications of Commercial Remote Sensing Satellites**,1998      *The Non-governmental Voice at the United Nations Third Special Session on Disarmament, New York, 31 May-25 June 1988* United Nations. Department for Disarmament Affairs,1988 From the John Holmes Library collection

*Commercial Satellite Imagery* Bhupendra Jasani,Gotthard Stein,2002-06-01 This will be the first book that deals with the use of commercial satellite imagery to monitor non proliferation of nuclear weapons non intrusively from space by an international organisation The book deals with both the technical as well as policy issues related to the nuclear weapons non proliferation issues The authors discuss how an international organisation such as the International Atomic Energy Agency can use information derived from satellites to enhance its policing task      A Handbook of Verification Procedures Dr. Frank Barnaby,1990-06-18 An examination of how in practice the effective verification of various arms control treaties including a comprehensive test ban treaty conventional forces reductions a fissile material cut off and a freeze on the development and production of nuclear weapons can be achieved      Global Problems and Common Security Josef Rotblat,Vitalii I. Goldanskii,2012-12-06 After many years of sterile arms control negotiations between the super powers which did not produce a single genuine disarmament measure and sometimes had the opposite effect of stimulating the development of new weapons to serve as bargaining chips an agreement to abolish completely two categories of nuclear weapons the INF Treaty was signed and is now being implemented This historical event the first actual destruction of deployed nuclear missiles although not of their warheads became possible largely because of the radical changes in the policies of the Soviet Union the new way of thinking advanced by its leader Mikhail Gorbachev The relaxation of tension that resulted from this policy was one of the factors contributing to the successful conclusion of the INF Treaty Another no less important factor was the acceptance by the Soviet Union of on site inspections as a basic element of a verification system essential to ensure compliance with the Treaty This breakthrough led to the mutual acceptance of an elaborate and precise verification regime and thus made possible the signing of the INF Treaty which in turn contributed to the further lessening of tension between East and West But perhaps the most important factor one which carries much promise for the future was the changed approach to security problems      *Nuclear-weapon-free Zone*. P. Moorthy,2006      **Cooperation and Discord in U.S.-Soviet Arms Control** Steve Weber,2014-07-14 If international cooperation was difficult to achieve and to sustain during the Cold War why then were two rival superpowers able to cooperate in placing limits on their central strategic weapons systems Extending an empirical approach to game theory particularly that developed by Robert Axelrod Steve

Weber argues that although nations employ many different types of strategies broadly consistent with game theory's tit for tat only strategies based on an ideal type of enhanced contingent restraint promoted cooperation in U S Soviet arms control As a theoretical analysis of the basic security behaviors of states the book has implications that go beyond the three bilateral arms control cases Weber discusses implications that remain important despite the end of superpower rivalry An important theoretical analysis of cooperation between the U S and the Soviet Union in the area of arms control An excellent work on a subject that has received very little attention Choice Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
