## **Satin Tunnels:**

Tunnels and Metropolises Arsenio Negro (Jr.), Argimiro A. Ferreira, 1998      **The Satin Moth** Jennie Dodd, 2023-07-21

This novel is a powerful grim historical fantasy story based around the slave trade of the 17th and 18th centuries and its repercussions on a family whose wealth is built on it. The first part of the story introduces the present day 10th Lord of Eastlyn Robert Montague and his family who continue to endure the consequences of a voodoo hex placed upon them centuries before. The second part describes the 1st Lord of Eastlyn George Montague a wealthy but cruel and callous slave trader and the enslavement of an Amazonian warrior named Nabila. Much of the novel's strength is rooted in its foregrounding which depicts man's inhumanity to man and the vile and heinous nature of slavery. The final part shows the effect the curse has had on the Montague family and describes the actions and courage of young cousins who set out to free themselves from the voodoo hex placed upon them. The twists and turns that take place as a result are comprehensive and will provide entertaining relief for the reader following this tale of human suffering and vindication.      **Dudley Randall,**

**Broadside Press, and the Black Arts Movement in Detroit, 1960-1995** Julius E. Thompson, 2005-02-15 In 1965 Dudley F. Randall founded the Broadside Press, a company devoted to publishing, distributing and promoting the works of black poets and writers. In so doing, he became a major player in the civil rights movement. Hundreds of black writers were given an outlet for their work and for their calls for equality and black identity. Though Broadside was established on a minimal budget, Randall's unique skills made the press successful. He was trained as a librarian and had spent decades studying and writing poetry. Most importantly, Randall was totally committed to the advancement of black literature. The famous and relatively unknown sought out Broadside, including such writers as Gwendolyn Brooks, Margaret Walker, Mae Jackson, Lance Jeffers, Etheridge Knight, Sonia Sanchez, Nikki Giovanni, Audre Lorde, and Sterling D. Plumpp. His story is one of battling to promote black identity and equality through literature and thus lifting the cultural lives of all Americans.      **Tunnels and**

**Underground Cities. Engineering and Innovation Meet Archaeology, Architecture and Art** Daniele Peila, Giulia Viggiani, Tarcisio Celestino, 2019-04-17 **Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art** contains the contributions presented at the World Tunnel Congress 2019, Naples, Italy, 3-9 May 2019. The use of underground space is continuing to grow due to global urbanization, public demand for efficient transportation and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. This vision was the source of inspiration for the design of the logos of both the International ITA and Italian SIG Tunnelling Association. By placing key infrastructures underground, the black circle in the logos, it will be possible to preserve and enhance the quality of the space at ground level, the green line. In order to consider and value underground space usage together with human and

social needs engineers architects and artists will have to learn to collaborate and develop an interdisciplinary design approach that addresses functionality safety aesthetics and quality of life and adaptability to future and varied functions The 700 contributions cover a wide range of topics from more traditional subjects connected to technical challenges of design and construction of underground works with emphasis on innovation in tunneling engineering to less conventional and archetypically Italian themes such as archaeology architecture and art The book has the following main themes Archaeology Architecture and Art in underground construction Environment sustainability in underground construction Geological and geotechnical knowledge and requirements for project implementation Ground improvement in underground constructions Innovation in underground engineering materials and equipment Long and deep tunnels Public communication and awareness Risk management contracts and financial aspects Safety in underground construction Strategic use of underground space for resilient cities Urban tunnels Tunnels and Underground Cities Engineering and Innovation meet Archaeology Architecture and Art is a valuable reference text for tunneling specialists owners engineers architects and others involved in underground planning design and building around the world and for academics who are interested in underground constructions and geotechnics
