**The Archaeology of Violence** Sarah Ralph, 2013-01-17 The Archaeology of Violence is an interdisciplinary consideration of the role of violence in social cultural and sociopolitical contexts The volume draws on the work of archaeologists anthropologists classicists and art historians all of whom have an interest in understanding the role of violence in their respective specialist fields in the Mediterranean and Europe The focus is on three themes contexts of violence politics and identities of violence and sanctified violence In contrast to many past studies of violence often defined by their subject specialism or by a specific temporal or geographic focus this book draws on a wide range of both temporal and spatial examples and offers new perspectives on the study of violence and its role in social and political change Rather than simply equating violence with warfare as has been done in many archaeological cases the volume contends that the focus on warfare has been to the detriment of our understanding of other forms of non warfare violence and has the potential to affect the ways in which violence is recognized and discussed by scholars and ultimately has repercussions for understanding its role in society

*Archaeologies of Internment* Adrian Myers,Gabriel Moshenska,2011-05-24 The internment of civilian and military prisoners became an increasingly common feature of conflicts in the twentieth century and into the twenty first Prison camps though often hastily constructed and just as quickly destroyed have left their marks in the archaeological record Due to both their temporary nature and their often sensitive political contexts places of internment present a unique challenge to archaeologists and heritage managers As archaeologists have begun to explore the material remains of internment using a range of methods these interdisciplinary studies have demonstrated the potential to connect individual memories and historical debates to the fragmentary material remains *Archaeologies of Internment* brings together in one volume a range of methodological and theoretical approaches to this developing field The contributions are geographically and temporally diverse ranging from Second World War internment in Europe and the USA to prison islands of the Greek Civil War South African labor camps and the secret detention centers of the Argentinean Junta and the East German Stasi These studies have powerful social cultural political and emotive implications particularly in societies in which historical narratives of oppression and genocide have themselves been suppressed By repopulating the historical narratives with individuals and grounding them in the material remains it is hoped that they might become at least in some cases archaeologies of liberation
