Savage Secrets:

Legal Secrets Kim Lane Scheppelle, 1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppelle answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppelle also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality

The Secret Life of Secrets Michael Slepian, 2022-06-07 If you've ever wondered why we keep secrets and what motivates us to spill them look no further Michael Slepian has spent the past decade studying the psychology of secrets and is ready to reveal his findings to the world Adam Grant 1 New York Times bestselling author of *Think Again* *The Secret Life of Secrets* gracefully blends engaging stories with compelling science Sonja Lyubomirsky University of California professor and author of *The How of Happiness* Think of a secret that you're keeping from others It shouldn't take long behavioral scientist Michael Slepian finds that on average we are keeping as many as thirteen secrets at any given time His research involving more than 50 000 participants from around the world shows that the most common secrets include lies we've told ambitions addictions mental health challenges hidden relationships and financial struggles Our secrets can weigh heavily upon us Yet the burden of secrecy Slepian argues rarely stems from the work it takes to keep a secret hidden Rather the weight of our secrets comes from carrying them alone without the support of

others Whether we are motivated to protect our reputation a relationship a loved one s feelings or some personal or professional goal one thing is clear Holding back some part of our inner world is often lonely and isolating But *The Secret Life of Secrets* shows you that it doesn t have to be Filled with fresh insight into one of the most universal yet least understood aspects of human behavior *The Secret Life of Secrets* sheds a fascinating new light on questions like At what age do children develop the cognitive capacity for secrecy Do all secrets come with the same mental load How can we reconcile our secrets with our human desires to relate connect and be known When should we confess our secrets Who makes for the ideal confidant And can keeping certain types of secrets actually enhance our well being Drawing on over a decade of original research *The Secret Life of Secrets* reveals the surprising ways that secrets pervade our lives and offers science based strategies that make them easier to live with The result is a rare window into the inner workings of our minds our relationships and our sense of who we are

Colombo Carl Muller,2000-10-14 Colombo is in the throes of an explosion Its face changes continuously its vices are legion its future as yet obscure and its paths speak of sunlight as well as of shadow Carl Muller begins his quasi fictional portrait of this beautiful war torn city by describing the great battles fought over it by European colonizers In AD 1505 a Portuguese fleet blown off course took shelter in Galle overthrew the local kings fortified Colombo and decided to stay The Dutch came along ousted the Portuguese made Colombo their capital and ruled till the British arrived and sent them packing Muller intersperses the tales of the past into descriptions of the battles that are being fought in Colombo today political battles in which vested interests play a major role as well as battles fought on the individual level in the struggle to survive young women and children turning to prostitution to earn an extra buck people begging in the streets to make ends meet unemployed young men turning to crime in frustration students demonstrating against atrocities lovers pining for nightfall in order to push away loneliness if only for a few moments Written in Muller s lucid style *Colombo A Novel* is a chronicle of a city s trials and triumphs

The Food Section Kimberly Wilmot Voss,2014-04-24 Food blogs are everywhere today but for generations information and opinions about food were found in the food sections of newspapers in communities large and small Until the early 1970s these sections were housed in the women s pages of newspapers where women could hold an authoritative voice The food editors often a mix of trained journalist and home economist reported on everything from nutrition news to features on the new chef in town They wrote recipes and solicited ideas from readers The sections reflected the trends of the time and the cooks of the community The editors were local celebrities judging cooking contests and getting calls at home about how to prepare a Thanksgiving turkey They were

consumer advocates and reporters for food safety and nutrition They helped make James Beard and Julia Child household names as the editors wrote about their television appearances and reviewed their cookbooks These food editors laid the foundation for the food community that Nora Ephron described in her classic 1968 essay The Food Establishment and eventually led to the food communities of today Included in the chapters are profiles of such food editors as Jane Nickerson Jeanne Voltz and Ruth Ellen Church who were unheralded pioneers in the field as well as Cecily Brownstone Poppy Cannon and Clementine Paddleford who are well known today an analysis of their work demonstrates changes in the country s culinary history The book concludes with a look at how the women s pages folded at the same time that home economics saw its field transformed and with thoughts about the foundation that these women laid for the food journalism of today
