ONE QUARTER OF HUMANITY James Z. LEE, Wang. Feng, 2009-06-30 One Quarter of Humanity presents evidence about historical and contemporary Chinese population behavior that overturns much of the received wisdom about the differences between China and the West James Lee and Wang Feng argue that there has been effective regulation of population growth in China through a variety of practices that depressed marital fertility to levels far below European standards and through the widespread practices of infanticide and abortion These practices and other distinctive features of the Chinese demographic and social system they argue led to a different demographic transition in China from the one that took place in the West

Sutter, 2015-12-15 Providence Canyon State Park also known as Georgia's Little Grand Canyon preserves a network of massive erosion gullies allegedly caused by poor farming practices during the nineteenth century It is a park that protects the scenic results of an environmental disaster While little known today Providence Canyon enjoyed a modicum of fame in the 1930s During that decade local boosters attempted to have Providence Canyon protected as a national park insisting that it was natural At the same time national and international soil experts and other environmental reformers used Providence Canyon as the apotheosis of human and particularly southern land abuse *Let Us Now Praise Famous Gullies* uses the unlikely story of Providence Canyon and the 1930s contest over its origins and meaning to recount the larger history of dramatic human induced soil erosion across the South and to highlight the role that the region and its erosive agricultural history played in the rise of soil science and soil conservation in America More than that though the book is a meditation on the ways in which our persistent mental habit of separating nature from culture has stunted our ability to appreciate places like Providence Canyon and to understand the larger history of American conservation *Of Poverty and Wealth* Alan Macfarlane, 2021-12-01 *Of Poverty and Wealth* Eric Hobsbawm Barry Supple and Gareth Stedman Jones is a collection of interviews that is being published as a book for the first time These interviews have been conducted by one of England's leading social anthropologists and historians Professor Alan Macfarlane Filmed over a period of several years the three conversations in this volume are part of the series *Creative Lives and Works* These transcriptions form a part of a larger set of interviews that cut across various disciplines from the social sciences and the sciences to the performing and visual arts The current volume is on three pre eminent economic historians There are many factors that lead to the rise and fall of power in which wealth trade and commerce play a vital role In this collection Eric Hobsbawm takes us through the fundamental and broader concepts of economic history while Barry Supple and Gareth Stedman Jones bring in the more focussed and often less discussed aspects of this branch of history Through these engaging conversations one gets a better understanding of poverty and wealth in the context of history The book will be of enormous value not just to those interested in the subject of Economics History and Comparative Studies but also to the uninitiated because of the lucidity which conversations bring to even otherwise opaque discussions Please note This title is co published with Social Science Press New Delhi Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka **The Unending Frontier** John F. Christian The dominant worldview in Japan is deeply animistic with beliefs such as the Japanese mana concept ki the Japanese soul concept and the concept of God god s kami being deeply rooted in the culture and fundamentally influencing society Dr Martin Hei wolf with his years of experience in Japan critically examines Japanese animism in light of core Christian beliefs such as the concepts of peace and salvation Central to Japanese people s rejection of Christian truth is the diametric opposition of its supernatural message to the natural focus of Japanese animistic folk religion Hei wolf s meticulous study is framed squarely within missiological thought and praxis so Christians serving in Japanese contexts are better able to communicate the message of the gospel by more fully understanding Japanese people people by whom God wants to be known
