Authors and Authority Patrick Parrinder, 1991 One of the great paradoxes of modern times is that the more scientists understand the natural world the more we discover that our everyday beliefs about it are wrong Neil F Comins has identified and classified by origin and topic over 1 700 commonly held misconceptions about the universe He presents the reader with the tools needed to probe erroneous notions so that we can begin to question for ourselves and to think more like scientists

The Impossible Observer Robert W. Uphaus, 2014-10-17 Rationality objectivity symmetry were these really principles

urged and exemplified by eighteenth century English prose In this persuasive study Robert W Uphaus argues that on the contrary many of the most important works of the period do not actually lead the reader into a new awareness of just how problematical how unsusceptible to reason both the world and our easy assumptions about it are Uphaus discusses a broad range of writers Swift Defoe Mandeyville Richardson Fielding Sterne Johnson and Godwin showing that beneath their variety lies a fundamentally similar challenge addressed to the critical procedure which assumes that the exercise of reason is a sufficient tool for an understanding the appeal of imaginative literature

The Manufacturers of Literature George Justice, 2002-02 The book combines an examination of the network of material conditions of authorship and publishing during the century with literary readings in order to explore the mutually constitutive nature of literature the material forces that influence its production and the social world of readers
